

THREE PHASE DIODE+THYRISTOR

DFA75BA80/160

SanRex Power Module, **DFA75BA**, is complex isolated module which is designed for rash current circuit.

It contains six diodes connected in a three phase bridge configuration, and a thyristor connected to a direct current line.

- This Module is designed very compactly. Because diode module and thyristor put together.
 - This Module is also isolated type between electorode terminal and mounting base. So you can put this Module and other one together in a same fin.
- (Application)
- Inverter for AC or DC motor control, Current stabilized power supply, Switching power supply.
