

MODEL 260 - INCREMENTAL ENCODER

Ø2.0"

FEATURES

- Low profile 1.19"
- Up to 12 pole commutation
- Available in Thru-Bore and Blind Hollow Bore
- Simple, innovative flexible mounting system
- Incorporates Opto-ASIC technology
- CE marking available

With a bore up to 0.625" and a low profile, the Model 260 Accu-Coder™ is the perfect solution for many machine and motor applications. Available in both hollow bore and a complete thru-bore, the Model 260 uses EPC's innovative anti-backlash mounting system, allowing simple, reliable, and precise encoder attachment. Unlike traditional kit or modular encoder designs, its integral bearing set provides stable and consistent operation without concerns for axial or radial shaft runout. For brushless servo motor applications, the Model 260 can be specified with three 120° electrical phase tracks to provide up to 12 pole commutation feedback. The optional extended temperature capability allows servo motors to operate at higher power outputs and duty cycles. And of course, the Model 260 uses EPC's pioneering Opto-ASIC design, so you'll always get a clean, reliable signal.

COMMON APPLICATIONS

Brushless Servo Motor Commutation, Robotics, Motor-Mounted Feedback, Assembly Machines, Digital Plotters, High Power Motors
