Surface Mount **Bandpass Filter**

50Ω 55 to 65 MHz

The Big Deal

- Low frequency 16.67% BW
- Fast roll-off
- High rejection, 40 dB from 80-900 MHz
- Miniature shielded package

Product Overview

The BPF-A60+ is a band pass filter in a shielded package (size of 0.365" x 1.360" x .35") fabricated using SMT technology. Covering 60 MHz ± 5 MHz bandwidth, these units offer good matching within the passband and high rejection. This unit uses a miniature high Q capacitors and wire welded inductors for high reliability. In addition it has repeatable performance across production lots and consistent performance across temperature.

Key Features

Feature	Advantages
Low frequency and fractional Band- width 16.67%	Fast-roll-of, this will attenuate frequency closer to the passband with good rejection value of > 20 dB.
More than 40 dB rejection up to 900 MHz	This enables the filter to attenuate spurious signals and reject harmonics for a broadband of fre- quency.
Shielded case	Reduced interference with and from the surrounding components.
