

Certified Evaluation Board for the **ADM2795E-EP** Robust 5 kV RMS Isolated RS-485 Transceiver with Level 4 DO-160G EMC and Full ± 42 V Protection

FEATURES

- 5 kV rms signal isolated RS-485 transceiver
- Convenient connections for power supplies and signals through screw terminal blocks and jumper connections
- 1.7 V to 5.5 V operating voltage range on VDD1 logic supply
- 3 V to 5.5 V operating voltage range on VDD2
- DO-160G Section 25 ESD protection: ± 15 kV air discharge
- Fully certified DO-160G EMC protection on RS-485 bus pins
 - Section 22 Lightning Protection Waveform 3, Waveform 4/ Waveform 1, Waveform 5A pin injection, Level 4 protection
- RS-485 A pin and RS-485 B pin human body model (HBM) ESD protection: $> \pm 30$ kV
- Evaluation board passes EN 55022 Class B radiated emissions with 6 dB μ V margin
- Provides A and B bus pin fault protection to ± 42 V ac/dc peak

EVALUATION KIT CONTENTS

EVAL-ADM2795EEPBZ

GENERAL DESCRIPTION

Use the EVAL-ADM2795EEPBZ evaluation board to easily evaluate the **ADM2795E-EP** 5 kV rms signal isolated RS-485 transceiver with Level 4 DO-160G EMC and 24 V supply fault protection. The EVAL-ADM2795EEPBZ evaluation board is easily configured through jumper connections and screw terminal blocks for signal and power connections. The EVAL-ADM2795EEPBZ can be powered with either a 9 V battery or a standard configurable bench top power supply. An on-board trimmer potentiometer and an on-board regulator circuit on both VDD1 and VDD2 allow easy power configuration when connected to a 9 V battery.

Full specifications for the **ADM2795E-EP** are listed in the **ADM2795E-EP** data sheet available from Analog Devices, Inc. and should be consulted in conjunction with this user guide when using the evaluation boards.

REVISION HISTORY

7/2017—Revision 0: Initial Version

CERTIFIED DO-160G EMC RS-485 EVALUATION BOARD

The EVAL-ADM2795EEPZ evaluation board has been lab tested and certified to provide RS-485 A, B bus pin protection against DO-160G Lighting Section 22 Waveform 3, Waveform 4/ Waveform 1, and Waveform 5A to Level 4 using 33 Ω or 47 Ω current limiting resistors to GND₂, or to Level 4 across the

isolation barrier to GND₁. The [ADM2795E-EP](#) was also tested and certified to provide robust protection against DO-160G Section 25 ESD, with ± 15 kV ESD air discharge protection. The EVAL-ADM2795EEPZ can withstand high voltage faults to ± 42 V ac/dc peak on RS-485 A, B bus pins.

EVALUATION BOARD HARDWARE

TEST SETUP

The EVAL-ADM2795EEPBZ evaluation board is shown in Figure 2 with the default jumper settings on LK1 and LK4 (driver and receiver enabled), power connections on J5 and J2, input signal connection on J3, and probes attached to RXD, TXD, A, and B for a loopback test.

JUMPER SETTINGS

Use the jumpers on the EVAL-ADM2795EEPBZ evaluation board to configure the inputs on the ADM2795E-EP (see Table 1). Do not place multiple jumper blocks on LK1 and LK4, because when placed together, the input sources can short. For each link, move a single jumper block from one position to another, as specified in Table 1.

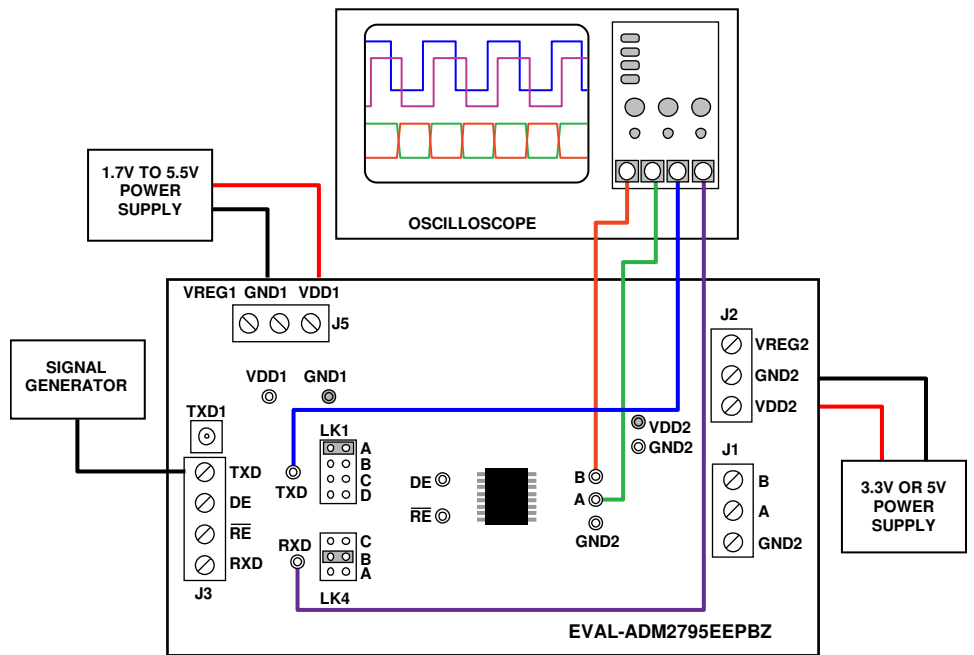

Figure 2. Basic Operation of the EVAL-ADM2795EEPBZ Evaluation Board for the ADM2795E-EP Robust 5 kV rms Isolated RS-485 Transceiver with Level 4 DO-160G and Full ±42 V Protection

Table 1. Jumper Configuration

Link	Connection	Description
LK1	A	Connects the driver enable input (DE) of the ADM2795E-EP to VDD1. This setting enables the driver.
	B	Connects the driver enable input (DE) of the ADM2795E-EP to GND1. This setting disables the driver.
	C	Connects the driver enable input (DE) of the ADM2795E-EP to the J3-2 terminal block connector.
	D	Connects the driver enable input (DE) of the ADM2795E-EP to the receiver enable input (\overline{RE}); that is, LK1 sets the input for both \overline{RE} and DE. This setting ensures that when the driver is enabled, the receiver is disabled, or when the driver is disabled, the receiver is enabled.
LK4	A	Connects the receiver enable input (\overline{RE}) of the ADM2795E-EP to VDD1. This setting disables the receiver.
	B	Connects the receiver enable input (\overline{RE}) of the ADM2795E-EP to GND1. This setting disables the driver. This setting enables the receiver.
	C	Connects the receiver enable input (\overline{RE}) of the ADM2795E-EP to the J3-3 terminal block connector.

TERMINATION AND PULL-UP/PULL-DOWN RESISTORS

The EVAL-ADM2795EEPZ evaluation board includes an R1 footprint for fitting a termination resistor between the A driver and the B driver outputs/receiver inputs. By default, the EVAL-ADM2795EEPZ is not fitted with a 120 Ω resistor (R1) between the A pin and the B pin. If the EVAL-ADM2795EEPZ is connected to a bus that is already terminated at both ends, remove this resistor. For more information about proper termination, see the [AN-960 Application Note, RS-485/RS-422 Circuit Implementation Guide](#).

Although the [ADM2795E-EP](#) has a built-in receiver fail-safe for the bus idle condition, there are footprints on the EVAL-ADM2795EEPZ evaluation board for fitting the R6 pull-up resistor to VDD2 on A, as well as the R7 pull-down resistor to GND2 on B. These resistors can be fitted when the user connects to other devices that require such external biasing resistors on the bus. The exact value required for a 200 mV minimum differential voltage in the bus idle condition depends on the VDD2 supply voltage (for example, 960 Ω for 3.3 V and 1440 Ω for 5 V). For more information about the bus idle fail-safe, see the [AN-960 Application Note, RS-485/RS-422 Circuit Implementation Guide](#).

DECOUPLING AND RESERVOIR CAPACITORS

The EVAL-ADM2795EEPZ uses the following decoupling and reservoir capacitors:

- On the logic side of the EVAL-ADM2795EEPZ, the C5 and C6 capacitors must be 10 μF tantalum and 100 nF ceramic capacitors, respectively, and the C7 capacitor must not be fitted.
- On the bus side of the EVAL-ADM2795EEPZ, the C3 and C1 capacitors must be 10 μF tantalum and 100 nF ceramic capacitors, respectively, and the C8 capacitor must not be fitted. A 100 nF ceramic capacitor (C2) must also be connected between Pin 12 and Pin 13.

Additional capacitors must be added for power regulation circuits:

- The C10, C13, C14, and C19 10 μF tantalum capacitors must be added to the VDD1 power regulation circuit.
- The C17 and C18 10 μF ceramic capacitors must be added to the VDD2 power regulation circuit.
- The C12, C15, C16, and C20 100 nF ceramic capacitors must be added to the power regulation circuits.

BOARD INTERNAL LAYER THICKNESS

The EVAL-ADM2795EEPZ evaluation board consists of two layers. The spacing between the top layer and the bottom layer is 1.6 mm. The EVAL-ADM2795EEPZ PCB has greater than 0.4 mm between Layer 1 and Layer 2, meeting requirements for isolation standards IEC 61010 Third Edition and IEC 60950, as described in the [AN-1109 Application Note, Recommendations for Control of Radiated Emissions with iCoupler Devices](#).

ROBUST DO-160G EMC RS-485 EVALUATION BOARD

The EVAL-ADM2795EEPZ evaluation board has been lab tested and certified to provide RS-485 A and RS-485 B bus pin protection for the following DO-160G standards and test levels. For more information see Table 2, Table 3, and Table 4.

- Protection against Section 22 Waveform 3 to Level 4 (1500 V, 60 A) using 47 Ω current limiting resistors on A and B bus pins.
- Protection against Section 22 Waveform 4/Waveform 1 to Level 4 (750 V, 150 A) using 33 Ω current limiting resistors on A and B bus pins.
- Protection against Section 22 Waveform 5A to Level 4 (750 V, 750 A) using 33 Ω current limiting resistors on A and B bus pins.
- Protection against Section 25 ESD to ± 15 kV air discharge.
- HBM ESD to $> \pm 30$ kV.

The EVAL-ADM2795EEPZ evaluation board was lab tested and certified to the following DO-160G standards, showing the robust EMC immunity provided by the isolation barrier:

- Protection against Section 22 Waveform 3 to Level 4 (1500 V, 60 A).
- Protection against Section 22 Waveform 4/Waveform 1 to Level 4 (750 V, 150 A).
- Protection against Section 22 Waveform 5A to Level 4 (750 V, 750 A).

The EVAL-ADM2795EEPZ evaluation board can withstand high voltage faults to ± 42 V ac/dc peak on RS-485 A and RS-485 B bus pins.

CERTIFIED DO-160G EMC PROTECTION

Table 2 details the open-circuit voltage (V_{oc}) and short-circuit current (I_{sc}) as specified in the DO-160G Section 22 Lightning transient susceptibility standard for Waveform 3, Waveform 4/Waveform 1, and Waveform 5A for pin injection testing. The peak currents for the DO-160G Level 4 tests are much greater than standard industrial surge IEC 61000-4-5 peak currents. The waveform shape and rise/decay times for the DO-160G standard are significantly longer than those specified by the IEC 61000-4-5 standard, as shown in Figure 3. Due to the high amounts of energy associated with the DO-160G Section 22 lightning standard, the [ADM2795E-EP](#) tested using external 33 Ω or 47 Ω A pin and B pin bus current limiting resistors for testing to GND2. These resistors were required in addition to the [ADM2795E-EP](#) integrated EMC protection circuitry; however, when testing to GND1, no current limiting resistors are required. The [ADM2795E-EP](#) iCoupler isolation technology protects the device in the presence of these extreme transients.

Figure 3. DO-160G Section 22 Waveform 1 and Waveform 5A, and IEC61000-4-5 Surge Waveform

DO-160G ADM2795E-EP TEST DETAILS

Figure 4 and Figure 5 show the Waveform 3 test setup coupling/decoupling network (CDN) and the Waveform 5A, Waveform 4/Waveform 1 CDN, respectively. For testing to the RS-485 bus side, GND2, an additional 33 Ω or 47 Ω current limiting resistance is added on both the A and B bus pins. DO-160G Section 22 testing is performed on one pin at a time. The test is not performed in common mode. Table 3 and Table 4 show a summary of the ADM2795E-EP certified test results.

NOTES

**ESD Caution**

ESD (electrostatic discharge) sensitive device. Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

Legal Terms and Conditions

By using the evaluation board discussed herein (together with any tools, components documentation or support materials, the "Evaluation Board"), you are agreeing to be bound by the terms and conditions set forth below ("Agreement") unless you have purchased the Evaluation Board, in which case the Analog Devices Standard Terms and Conditions of Sale shall govern. Do not use the Evaluation Board until you have read and agreed to the Agreement. Your use of the Evaluation Board shall signify your acceptance of the Agreement. This Agreement is made by and between you ("Customer") and Analog Devices, Inc. ("ADI"), with its principal place of business at One Technology Way, Norwood, MA 02062, USA. Subject to the terms and conditions of the Agreement, ADI hereby grants to Customer a free, limited, personal, temporary, non-exclusive, non-sublicensable, non-transferable license to use the Evaluation Board FOR EVALUATION PURPOSES ONLY. Customer understands and agrees that the Evaluation Board is provided for the sole and exclusive purpose referenced above, and agrees not to use the Evaluation Board for any other purpose. Furthermore, the license granted is expressly made subject to the following additional limitations: Customer shall not (i) rent, lease, display, sell, transfer, assign, sublicense, or distribute the Evaluation Board; and (ii) permit any Third Party to access the Evaluation Board. As used herein, the term "Third Party" includes any entity other than ADI, Customer, their employees, affiliates and in-house consultants. The Evaluation Board is NOT sold to Customer; all rights not expressly granted herein, including ownership of the Evaluation Board, are reserved by ADI. CONFIDENTIALITY. This Agreement and the Evaluation Board shall all be considered the confidential and proprietary information of ADI. Customer may not disclose or transfer any portion of the Evaluation Board to any other party for any reason. Upon discontinuation of use of the Evaluation Board or termination of this Agreement, Customer agrees to promptly return the Evaluation Board to ADI. ADDITIONAL RESTRICTIONS. Customer may not disassemble, decompile or reverse engineer chips on the Evaluation Board. Customer shall inform ADI of any occurred damages or any modifications or alterations it makes to the Evaluation Board, including but not limited to soldering or any other activity that affects the material content of the Evaluation Board. Modifications to the Evaluation Board must comply with applicable law, including but not limited to the RoHS Directive. TERMINATION. ADI may terminate this Agreement at any time upon giving written notice to Customer. Customer agrees to return to ADI the Evaluation Board at that time. LIMITATION OF LIABILITY. THE EVALUATION BOARD PROVIDED HEREUNDER IS PROVIDED "AS IS" AND ADI MAKES NO WARRANTIES OR REPRESENTATIONS OF ANY KIND WITH RESPECT TO IT. ADI SPECIFICALLY DISCLAIMS ANY REPRESENTATIONS, ENDORSEMENTS, GUARANTEES, OR WARRANTIES, EXPRESS OR IMPLIED, RELATED TO THE EVALUATION BOARD INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTY OF MERCHANTABILITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT OF INTELLECTUAL PROPERTY RIGHTS. IN NO EVENT WILL ADI AND ITS LICENSORS BE LIABLE FOR ANY INCIDENTAL, SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES RESULTING FROM CUSTOMER'S POSSESSION OR USE OF THE EVALUATION BOARD, INCLUDING BUT NOT LIMITED TO LOST PROFITS, DELAY COSTS, LABOR COSTS OR LOSS OF GOODWILL. ADI'S TOTAL LIABILITY FROM ANY AND ALL CAUSES SHALL BE LIMITED TO THE AMOUNT OF ONE HUNDRED US DOLLARS (\$100.00). EXPORT. Customer agrees that it will not directly or indirectly export the Evaluation Board to another country, and that it will comply with all applicable United States federal laws and regulations relating to exports. GOVERNING LAW. This Agreement shall be governed by and construed in accordance with the substantive laws of the Commonwealth of Massachusetts (excluding conflict of law rules). Any legal action regarding this Agreement will be heard in the state or federal courts having jurisdiction in Suffolk County, Massachusetts, and Customer hereby submits to the personal jurisdiction and venue of such courts. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to this Agreement and is expressly disclaimed.
