This user guide supports the evaluation kit for the FAN6230A. It should be used in conjunction with the FAN6230A datasheet as well as Fairchild's application notes and technical support team. Please visit Fairchild's website at <http://www.fairchildsemi.com>.

1. Introduction

This document is an engineering report describing measured performance of the FAN6230A evaluation board.

1.1. General Description

The FAN6230A is a controller that improves efficiency in secondary-side Synchronous Rectifier (SR) MOSFETs. An internal shunt regulator with low bias current and an internal charge pump circuit reduce external part counts, total cost, and system power consumption. Adoption of the internal charge pump circuit allows the FAN6230A to work very well under low bias voltage conditions with good Constant Current (CC) regulation without a rectifier diode.

FAN6230A also features adjustable cable compensation for precise constant voltage regulations at the cable end.

Unlike the traditional method of measuring the SR MOSFET drain-to-source voltage to sense the current, which is sensitive to the noise introduced by poor PCB layout, the FAN6230A uses innovative Linear-Prediction Timing Control (LPC) to estimate the SR MOSFET turn-on time without additional current-sensing circuitry.

In Green Mode, the FAN6230A shuts off the SR MOSFETs, which lowers bias current down to 500 μ A, so the total power consumption of the system is further reduced.

1.2. Features

- Secondary-Side SR Controller for Flyback Converters
- Smooth Operation in DCM and CCM
- Integrated Shunt Regulator
- Integrated Charge Pump Circuit for CC Region
- Output Cable Compensation Circuit
- Green-Mode Improves Light-Load Efficiency and No-Load Power Consumption
- PWM Frequency Tracking Using Secondary-Side Winding Voltage
- Ultra Low V_{DD} Operating Voltage for 5 V Output Applications
- Ultra-Low Green-Mode Operating Current (0.5 mA, Typical)
- 16-Pin MLP33 Package
- Advanced Protections
 - RES Dropping Protection (Disable Gate Drive)
 - Over-Temperature Protection (Auto-Restart)

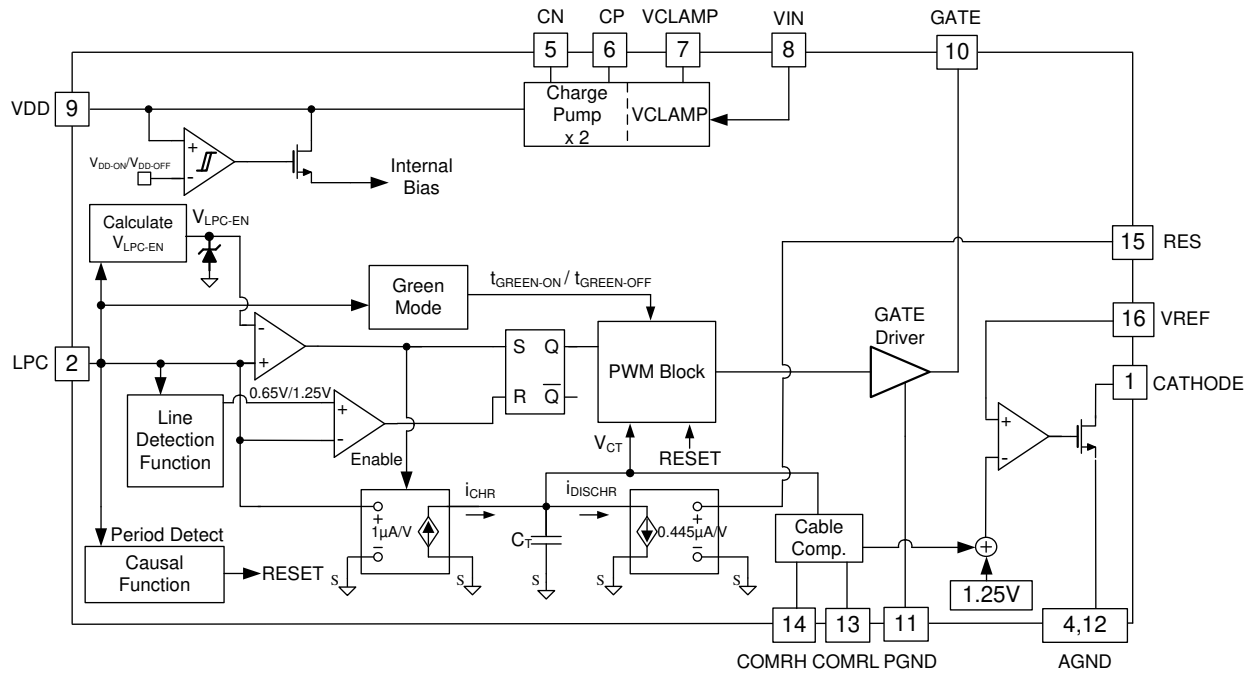

Figure 1. Internal Block Diagram

2. Evaluation Board Specifications

All data for this table was measured at an ambient temperature of 25°C

Table 1. Evaluation Board Specifications

Fairchild Devices	FAN501 + FAN6230A
Input Voltage Range	85 ~ 264 V _{AC}
Frequency	60 / 50 Hz
Maximum Output Power	12.5 W
Output Full-Load Condition	5 V / 2.5 A

WARNING AND DISCLAIMER

Replace components on the Evaluation Board only with those parts shown on the parts list (or Bill of Materials) in the Users' Guide. Contact an authorized Fairchild representative with any questions.

This board is intended to be used by certified professionals, in a lab environment, following proper safety procedures. Use at your own risk. The Evaluation board (or kit) is for demonstration purposes only and neither the Board nor this User's Guide constitute a sales contract or create any kind of warranty, whether express or implied, as to the applications or products involved. Fairchild warrants that its products meet Fairchild's published specifications, but does not guarantee that its products work in any specific application. Fairchild reserves the right to make changes without notice to any products described herein to improve reliability, function, or design. Either the applicable sales contract signed by Fairchild and Buyer or, if no contract exists, Fairchild's standard Terms and Conditions on the back of Fairchild invoices, govern the terms of sale of the products described herein.

DISCLAIMER

FAIRCHILD SEMICONDUCTOR RESERVES THE RIGHT TO MAKE CHANGES WITHOUT FURTHER NOTICE TO ANY PRODUCTS HEREIN TO IMPROVE RELIABILITY, FUNCTION, OR DESIGN. FAIRCHILD DOES NOT ASSUME ANY LIABILITY ARISING OUT OF THE APPLICATION OR USE OF ANY PRODUCT OR CIRCUIT DESCRIBED HEREIN; NEITHER DOES IT CONVEY ANY LICENSE UNDER ITS PATENT RIGHTS, NOR THE RIGHTS OF OTHERS.

LIFE SUPPORT POLICY

FAIRCHILD'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS WRITTEN APPROVAL OF THE PRESIDENT OF FAIRCHILD SEMICONDUCTOR CORPORATION.

As used herein:

1. Life support devices or systems are devices or systems which, (a) are intended for surgical implant into the body, or (b) support or sustain life, or (c) whose failure to perform when properly used in accordance with instructions for use provided in the labeling, can be reasonably expected to result in significant injury to the user.
2. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

ANTI-COUNTERFEITING POLICY

Fairchild Semiconductor Corporation's Anti-Counterfeiting Policy. Fairchild's Anti-Counterfeiting Policy is also stated on our external website, www.fairchildsemi.com, under Sales Support.

Counterfeiting of semiconductor parts is a growing problem in the industry. All manufacturers of semiconductor products are experiencing counterfeiting of their parts. Customers who inadvertently purchase counterfeit parts experience many problems such as loss of brand reputation, substandard performance, failed applications, and increased cost of production and manufacturing delays. Fairchild is taking strong measures to protect ourselves and our customers from the proliferation of counterfeit parts. Fairchild strongly encourages customers to purchase Fairchild parts either directly from Fairchild or from Authorized Fairchild Distributors who are listed by country on our web page cited above. Products customers buy either from Fairchild directly or from Authorized Fairchild Distributors are genuine parts, have full traceability, meet Fairchild's quality standards for handling and storage and provide access to Fairchild's full range of up-to-date technical and product information. Fairchild and our Authorized Distributors will stand behind all warranties and will appropriately address any warranty issues that may arise. Fairchild will not provide any warranty coverage or other assistance for parts bought from Unauthorized Sources. Fairchild is committed to combat this global problem and encourage our customers to do their part in stopping this practice by buying direct or from authorized distributors.

EXPORT COMPLIANCE STATEMENT

These commodities, technology, or software were exported from the United States in accordance with the Export Administration Regulations for the ultimate destination listed on the commercial invoice. Diversion contrary to U.S. law is prohibited.

U.S. origin products and products made with U.S. origin technology are subject to U.S. Re-export laws. In the event of re-export, the user will be responsible to ensure the appropriate U.S. export regulations are followed.
