# 100 Feet 9-Conductor (24AWG) Stranded-Shielded Bulk Cable
M110-9C24G-100

These 24AWG (American Wire Gauge) 9 bare copper conductor RS-232 multiconductor cables are used to create serial patch cables for a wide variety of applications, usually for computer peripherals.

RS-232 is a precursor to USB and is used for many of the same devices, such as printers, as well as modems.

RS-232 is also commonly used for sophisticated machinery in laboratories, automated manufacturing plants, and other hi-tech environments.

100% Overall Foil Shield.

Specifications/Contents:
Model: M110-9C24G-100
Length: 100 ft
Weight: 4 lbs
Outer Diameter: 5.9 mm
