## BlueChip Multi-hop Evaluation kit BCP-MH-E21

The BCP-MH-21 evaluation kit contains four HD-PLC compliant devices (configured as one master, and three terminals), demonstrating our broadband PLC with multi-hop mesh network technology; the evaluation kit contains all the hardware, software, documentation and tools to enable the configuration and evaluation of the MLKHN1501 performance.

If additional devices are required, the BCP-MH-E22 kit contains two additional devices that can be purchased separately.
