Model No. GW6DMD**NFC

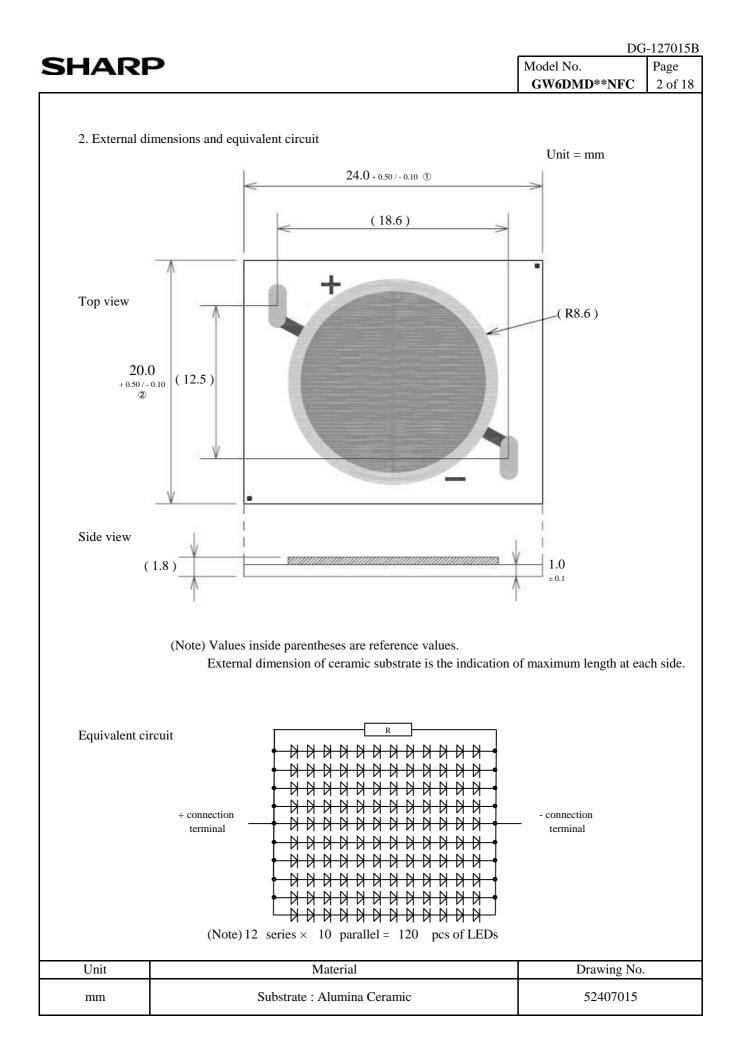

- Handle this document carefully for it contains material protected by international copyright law. Any reproduction, full or in part, of this material is prohibited without the express written permission of the company.
- When using the products covered herein, please observe the conditions written herein and the precautions outlined in the following paragraphs. In no event shall the company be liable for any damages resulting form failure to strictly adhere to these conditions and precautions.
 - (1) Please do verify the validity of this part after assembling it in customer's products, when customer wants to make catalogue and instruction manual based on the specification sheet of this part.
 - (2) The products covered herein are designed and manufactured for the following application areas. When using the products covered herein for the equipment listed in paragraph (3), even for the following application areas, be sure to observe the precautions given in Paragraph (3). Never use the products for the equipment listed in Paragraph (4).
 - •Office electronics
 - ·Instrumentation and measuring equipment
 - Machine tools
 - ·Audiovisual equipment
 - •Home appliances
 - ·Communication equipment other than for trunk lines
 - (3) These contemplating using the products covered herein for the following equipment which demands high reliability, should first contact a sales representative of the company and then accept responsibility for incorporating into the design fail-safe operation, redundancy, and other appropriate measures for ensuring reliability and safety of the equipment and the overall system.
 - asures for ensuring remainity and safety of the equipment and the overall system
 - ·Control and safety devices for airplanes, trains, automobiles, and other
 - transportation equipment
 - Mainframe computers
 - •traffic control systems
 - ·Gas leak detectors and automatic cutoff devices
 - ·Rescue and security equipment
 - ·Other safety devices and safety equipment, etc.
 - (4) Do not use the products covered herein for the following equipment which

demands extremely high performance in terms of functionality, reliability, or accuracy.

- ·Aerospace equipment
- ·Communications equipment for trunk lines
- ·Control equipment for the nuclear power industry
- •Medical equipment related to life support, etc.
- (5) please direct all queries and comments regarding the interpretation of the above four Paragraphs to a sales representative of the company.

• Please direct all queries regarding the products covered herein to a sales representative of the company.

SHARP

- 3. Ratings and characteristics
- 3-1. Absolute maximum ratings

Item	Symbol	Rating	Unit
Power Dissipation *1,4	Р	52.0	W
Forward Current *1,4	I _F	1300	mA
Reverse Voltage *2,4	V _R	-15	V
Operating Temperature *3	T _{opr}	$-30 \sim +100$	°C
Storage Temperature	T _{stg}	- $40 \sim +100$	°C

*1 Power dissipation and forward current are the value when the module temperature is set lower than the rating by using an adequate heat sink.

- *2 Voltage resistible at initial connection error (Not dealing with the possibility of always-on reverse voltage.)
- *3 Case temperature Tc (Refer to measuring point for case temperature in the next page.) Refer to "Derating curve" in the next page as for operating current.

*4 $T_c = 25 \ ^{\circ}C$

(Note) To keep the case temperature lower than the rating, enough heat-radiation performance needs to be secured by using an adequate heat sink.

For soldering connection, please evaluate in your circumstance to make sure soldering reliability. (Above derating curve is specified to LED device, not for soldering connection) And please consider to avoid physical stress between wire and substrate, and some protection like silicon bond on top of soldered wire is recommended.

Please ensure the maintenance of heat radiation not to exceed case temperature over the rating in operation.

7. Precautions	
① Storage conditions	
Please follow the conditions below.	
• Before opened: Temperature 5 \sim 30 °C, Relative humidity less th	an 60 %.
(Before opened LED should be used within a year)	
• After opened: Temperature 5 \sim 30 °C, Relative humidity less than	n 60 %.
(Please apply soldering within 1 week)	
•After opened LED should be kept in an aluminum moisture proof be	ag with a moisture
absorbent material (silica gel).	
 Avoid exposing to air with corrosive gas. 	
If exposed, electrode surface would be damaged, which may affect	soldering.
2 Usage conditions	
This product is not designed for the use under any of the following c	
Please confirm performance and reliability well enough if you use up	nder any of the following conditions;
• In a place with a lot of moisture, dew condensation, briny air, and (Cl, H_2S , NH_3 , SO_2 , NO_{X_1} etc.)	corrosive gas.
• Under the direct sunlight, outdoor exposure, and in a dusty place.	
• In water, oil, medical fluid, and organic solvent.	
•Please do not use component parts contain sulfur (gasket packing, a	dhesive material, etc.).
③ Heat radiation	
If forward current (I_F) is applied to single-state module at any current	t, there is a risk of damaging LED
or emitting smoke.	
Equip with specified heat radiator, and avoid heat stuffed inside the	module.
④ Installation	
Material of board is alumina ceramic. If installed inappropriately, tro	-
board crack or overheat. Please take particular notice for installation.	
Refer to the following cautions on installation.	
Apply thermolysis adhesive, adhesive sheet or peculiar connector	
In case of applying adhesive or adhesive sheet only, check the eff	• •
If LED comes off from heat radiator, unusual temperature rise en	
device deterioration, coming off of solder at leads, and emitting s	
 When LED device is mechanically fixed or locked, Please take in attachment due to fail from stress. 	to consideration regarding the method
Avoid convexly uneven boards.	
Convex board is subject to substrate cracking or debasement of h

HARP	Model No.	F-127015
	GW6DMD**NFC	16 of 1
 Do not touch resin part including white resin part on the surface of LED. No light emission may occur due to damage of resin or cutting wire of LE When using tweezers, please handle by ceramic substrate part and avoid to For mounting, please handle by side part of ceramic or the specified area and	ouching resin part.	
 (5) Connecting method In case of solder connecting method, follow the conditions mentioned below 		
 Use Soldering iron with thermo controller (tip temperature 380 °C), within Secure the solderwettability on whole solder pad and leads. 	5 seconds per one place.	
 During the soldering process, put the ceramic board on materials whose contor not to radiate heat of soldering. Warm up (with using a heated plate) the substrate is recommended before a solution of the substrate is recommended b		
(preheat condition: $100 ^{\circ}\text{C} \sim 150 ^{\circ}\text{C}$, within 60 sec) • Avoid touching a part of resin with soldering iron.	C .	
• This product is not designed for reflow and flow soldering.		
 Avoid such lead arrangement as applying stress to solder-applied area. Please do not detach solder and make re-solder. 		
• Please solder evenly on each electrodes.		
• Please prevent flux from touching to resin.		
6 Static electricity		
This product is subject to static electricity, so take measures to cope with it. Install circuit protection device to drive circuit, if necessary.		
⑦ Drive method		
• Any reverse voltage cannot be applied to LEDs when they are in operation Design a circuit so that any flow of reverse or forward voltage can not be ap when they are out of operation.		
 Module is composed of LEDs connected in both series and parallel. Constant voltage power supply runs off more than specified current amount caused by temperature rise. Constant current power supply is recommended to drive. 	due to lowered V _F	
8 Cleaning		
Avoid cleaning, since silicone resin is eroded by cleaning.		
③ Color-tone variation Chromaticity of this product is monitored by integrating sphere right after the Chromaticity varies depending on measuring method, light spread condition, Please verify your actual conditions before use.	-

- 10 Safety
 - ·Please prevent to see lighting LED devices directly at any moment for safety your eyes.
 - ·Looking light from LEDs for a long time may result in hurt your eyes.
 - •In case that excess current (over ratings) are supplied to the device, hazardous phenomena including abnormal heat generation, emitting smoke, or catching fire can be caused.
 - Take appropriate measures to excess current and voltage.
 - •In case of solder connecting method, there is a possibility of fatigue failure by heat.
 - Please fix the leads in such case to protect from short circuit or leakage of electricity caused by contact.
 - •Please confirm the safety standards or regulations of application devices.
 - •Please careful not to injure your hand by edge of ceramic substrate.
- 1 Other cautions

Guarantee covers the compliance to the quality standards mentioned in the Specifications,

however it does not cover the compatibility with application of the end-use, including assembly and usage environment.

In case any quality problems occurred in the application of end-use, details will be separately discussed and determined between the parties hereto.

(Note) Characteristics data shown here are for reference purpose only. (Not guaranteed data)
