Jumper wires 20cm M/F, pack of 40	4128-40	

WIRE KITS

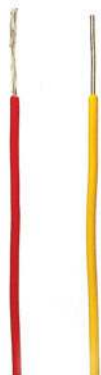

The wire kit contains 14 different lengths of wire from 0.1" to 5". The wires are insulated in different colours and are formed ready for use. They come in a handy storage case and are ideal for use with the prototype board.

Description	Code	1+
Small wire kit - 140 pieces	2402	
Large wire kit - 350 pieces	2403	

WIRE

Rolls of wire, 100 metres in length and 1.2mm outer diameter are available in solid core or multi strand. Solid core (1 x 0.6mm core) cable is ideal for links on prototype board, strip board and PCBs. Multi strand (7 x 0.2mm cores) cable is ideal for connecting items to boards where the cable may flex. Available in black, red, blue and yellow.

Also available is extra flexible wire used in our steady hand game products. The wires flexibility makes it ideal for many interconnecting tasks. This product is sold in 25 metre rolls and has a 2.8mm outer diameter.

Description	Code	1+
Solid core cable, 100m reel, black	2414	
Solid core cable, 100m reel, red	2415
