Description

This device is an automotive grade SCR Thyristor designed for applications such as automotive and stationary battery chargers.

Rated for 30 A_{RMS} power switching, this SCR Thyristor offers superior performance in terms of peak voltage robustness (up to 1400 V) and surge current handling (sine wave pulse up to 300 A). Its key features allow the design of functions such as a 42 A_{RMS} AC switch (dual back-to-back SCRs) and a 38 A av. AC-DC controlled rectifier bridge.

Available in HU³PAK package, it is ideal for compact SMD designs on surface mount boards or insulated metal substrate boards and and top-side cooling.
