**AMEOF5-BJZ**

Open Frame SIP

The AMEOF5-BJZ is a compact open frame AC/DC converter that offers an ultra-wide input voltage range of 90-528VAC. This converter is part of Aimtec's wide input voltage range product family offered in 1, 2, 3, 5, 10 & 20 watts.

Aimtec's AMEOF5-BJZ features low power consumption, high efficiency & reliability, and 4000VAC isolation. It also meets the IEC/UL/EN62368 standards, which makes it suitable for many industrial applications such as controls and instrumentation. Furthermore, the ultra-wide input voltage range also makes this converter a perfect candidate for 3 phase applications.

**Features**

- Input: 90-528VAC, 100-745VDC
- I/O Isolation 4000VAC
- Continuous Short circuit protection
- Operating Temp: -40 to +85°C
- Low power consumption ≤ 0.5W at 528VAC
- Compact open frame SIP
- Over current protection
- Class II power supply

- For C1 and C2, use the same brand, model, and batch of electrolytic filter capacitors for the best result.
- For R1 and R2, the maximum operation voltage rating should be at least 450V or higher. It is recommended to connect multiple chip resistors in series to satisfied the voltage rating requirement.
- R3 is for surge current suppression.
- C3, C4, and L2 form a PI filter. It is recommended to use high frequency, high ripple current and low ESR electrolytic capacitors for C3 and C4. The voltage rating for the capacitors and the current rating for L1 and L2 should have at least 20% of margin. Use ceramic capacitors for high-frequency filtering capacitors C5, C6, C7, and C8. In case of a converter failure, A suppressor diode (TVS) is recommended.
- This is an open frame converter, the primary and secondary side external components of the module need at least 10mm safety distance in order to meet the safety requirement.
