

| DM200 DIP TAPE DEPTH GAUGING SYSTEM

This is a simple but effective portable gauging system for determining the level of water in boreholes up to a maximum depth of 200 metres.

The probe is lowered down the hole, by unwinding the cable reel, until such time as the signal is activated on the reel. The depth can then be read off the cable, which is marked with the length at 10 cm intervals.

This requires no external power source, as it is powered by an internal battery.

Features

- Portable system
- Depth gauging for water boreholes
- Visual and acoustic signal when in water
- 200 metre cable with length marking printed every 10cm.
- Water sensing with conductive probe

STANDARD PARTS

Standard Parts	Max depth	Mark intervals	Cable type
DM200	200 metres	10 cm	PVC sheathed 2 core

Sensata Technologies, Inc. ("Sensata") data sheets are solely intended to assist designers ("Buyers") who are developing systems that incorporate Sensata products (also referred to herein as "components"). Buyer understands and agrees that Buyer remains responsible for using its independent analysis, evaluation and judgment in designing Buyer's systems and products. Sensata data sheets have been created using standard laboratory conditions and engineering practices. Sensata has not conducted any testing other than that specifically described in the published documentation for a particular data sheet. Sensata may make corrections, enhancements, improvements and other changes to its data sheets or components without notice.

Buyers are authorized to use Sensata data sheets with the Sensata component(s) identified in each particular data sheet.
