DATASHEET

Media+™ UWB Chip Antenna (NN01-107) Ultra Wideband (UWB) (3.1 – 5 GHz)

Ignion specializes in enabling effective mobile communications. Using Ignion technology, we design and manufacture optimized antennas to make your wireless devices more competitive. Our mission is to help our clients develop innovative products and accelerate their time to market through our expertise in antenna design, testing and manufacturing.

The Media+™ UWB chip antenna is a high-performance, cost-effective antenna designed to meet the requirements of reference designers, OEMs and ODMs considering the Multiband OFDM alliance (MBOA) recommendations for Ultra-Wideband devices.

The electrical and mechanical characteristics of this small SMD monopole chip antenna ensures design flexibility and optimal performance in devices such as – but not limited to – Wireless USB (W-USB) and W-USB enabled devices like digital cameras, video recorders, PC Peripherals, beamers, PDAs, mobile phones, wireless compact flash and secure digital cards, and other consumer electronic devices.

The Media+™ UWB antenna is built on glass epoxy substrate.
