# **TCT Series** Chip Tantalum Capacitors (Large Capacitance)

#### **FEATURES**

- Ta-MnO₂ technology
- Low DCL
- High CV .
- . Parameters stability over voltage and time Undertab LF

#### APPLICATIONS

· For high component density PCB design

### **TECHNICAL SPECIFICATIONS**

| Technical Data:        | All technical data relate to an ambient temperature of +25°C |  |
|------------------------|--|--|
| Capacitance Range:     | 0.33µF to 220µF  |  |
| Capacitance Tolerance: | ±20%   |  |
| Leakage Current DCL:   | Please see the ratings and part number reference table below |  |
| Temperature Range:     | -55°C to +125°C  |  |

Note: Conductive Polymer Capacitors are designed to operate within the limits of the environmental conditions specified for each series. If operated continuously at their maximum temperature and / or humidity limit, or beyond these limits, capacitors may exhibit a parametric shift in capacitance and increases in ESR. These changes may occur earlier if the specified environmental conditions are exceeded. Similarly, their normal operational time period will be significantly extended if their general duty cycle includes operation below maximum temperature within humidity controlled environments. Careful attention should be paid to maximum temperature with associated high humidity environments as well as voltage derating, ripple current and current surges.

Please reference the KYOCERA AVX Conductive Polymer Capacitor Guidelines for more information or contact factory for application assistance.

🛿 KUDEERE | The Important Information/Disclaimer is incorporated in the catalog where these specifications came from or available

online at www.kyocera-avx.com/disclaimer/ by reference and should be reviewed in full before placing any order.

Moisture Sensitivity Level (MSL) is defined according to J-STD-020. All technical data relates to an ambient temperature of +25C.

Capacitance and DF are measured at 120Hz, 0.5RMS with DC bias of 1.5 volts. DCL is measured at rated voltage after 5 minutes. Impedance allowed to move up to 1.25 times catalog limit post mounting.

NOTE: KYOCERA AVX reserves the rights to supply higher voltage rating in the same case size, to the same reliability standards.

\*Initial Limit

For use outside of recommended conditions and special request, please contact KYOCERA AVX.

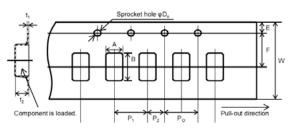

Initial measurement max. 1hr after the removal from dry pack or after pretreatment at 85°C for 24 hours.

The Important Information/Disclaimer is incorporated in the catalog where these specifications came from or available online at www.kyocera-avx.com/disclaimer/ by reference and should be reviewed in full before placing any order.
