

**Quasi-Resonant method  
Isolated Output Power 90W  
BM1Q104FJ-EVK-001**

**User's Guide**

## <High Voltage Safety Precautions>

◇ Read all safety precautions before use

Please note that this document covers only the **BM1Q104FJ** evaluation board (BM1Q104FJ-EVK-001) and its functions. For additional information, please refer to the datasheet.

**To ensure safe operation, please carefully read all precautions before handling the evaluation board**

Depending on the configuration of the board and voltages used,

**Potentially lethal voltages may be generated.**

Therefore, please make sure to read and observe all safety precautions described in the red box below.

### Before Use

- [1] Verify that the parts/components are not damaged or missing (i.e. due to the drops).
- [2] Check that there are no conductive foreign objects on the board.
- [3] Be careful when performing soldering on the module and/or evaluation board to ensure that solder splash does not occur.
- [4] Check that there is no condensation or water droplets on the circuit board.

### During Use

- [5] Be careful to not allow conductive objects to come into contact with the board.
- [6] **Brief accidental contact or even bringing your hand close to the board may result in discharge and lead to severe injury or death.**

**Therefore, DO NOT touch the board with your bare hands or bring them too close to the board.**

In addition, as mentioned above please exercise extreme caution when using conductive tools such as tweezers and screwdrivers.

- [7] If used under conditions beyond its rated voltage, it may cause defects such as short-circuit or, depending on the circumstances, explosion or other permanent damages.
- [8] Be sure to wear insulated gloves when handling is required during operation.

### After Use

- [9] The ROHM Evaluation Board contains the circuits which store the high voltage. Since it stores the charges even after the connected power circuits are cut, please discharge the electricity after using it, and please deal with it after confirming such electric discharge.
- [10] Protect against electric shocks by wearing insulated gloves when handling.

This evaluation board is intended for use only in research and development facilities and should be handled **only by qualified personnel familiar with all safety and operating procedures.**

We recommend carrying out operation in a safe environment that includes the use of high voltage signage at all entrances, safety interlocks, and protective glasses.

AC/DC Converter

## Quasi-Resonant method Isolated 90W 20V 4.5A BM1Q104FJ Evaluation Board BM1Q104FJ-EVK-01

### General Description

This evaluation board outputs an isolated voltage of 20 V from an input of 90 Vac to 264 Vac, and the maximum output current is 4.5 A.

The BM1Q104FJ, the QR controller for AC/DC power supplies, provides the optimal system for all products where an outlet is present.

Figure 1. BM1Q104FJ-EVK-004

## Performance Specification

### Electrical characteristic

Not guarantee the characteristics is representative value.

Unless otherwise specified  $V_{IN} = 230 \text{ Vac}$ ,  $I_{OUT} = 4.5 \text{ A}$ ,  $T_a = 25 \text{ }^\circ\text{C}$

Parameter	Symbol	Min	Typ	Max	Units	Conditions
Input Voltage Range	$V_{IN}$	90	230	264	V	
Input Frequency	$f_{LINE}$	47	-	63	Hz	
Output Voltage	$V_{OUT}$	19.0	20.0	21.0	V	
Output Current Range <sup>(Note 1)</sup>	$I_{OUT1}$	0	-	4.5	A	
Maximum Output Power <sup>(Note 1)</sup>	$P_{OUT}$			90	W	
Standby Input Power	$P_{INSTBY}$	-	105	-	mW	$I_{OUT} = 0 \text{ A}$ $V_{IN} = 230\text{V}$
Power supply efficiency	$\eta$	86	90.4	-	%	
Output Ripple Voltage <sup>(Note 2)</sup>	$V_{ripple1}$	-	0.18	0.20	Vpp	
Operating Temperature		-10	+25	+65	$^\circ\text{C}$	

## Derating

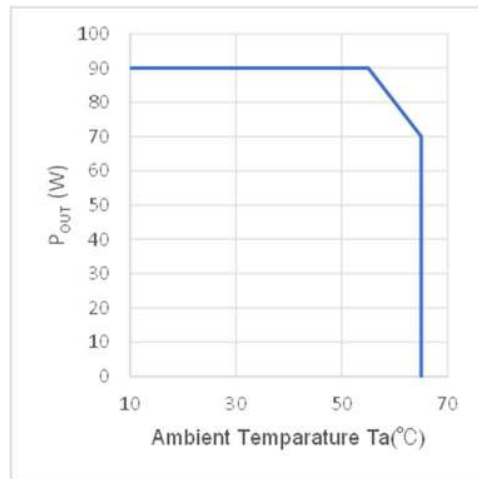

Figure 2. Temperature derating curve

## Operation Procedure

### 1 Necessary Equipment

- (1) AC power supply (90 Vac to 264 Vac, 200 W or more)
- (2) Load equipment (5 A at maximum value)
- (3) DC voltmeter

### 2 Connect to Each Equipment

- (1) Preset the AC power to 90 Vac to 264 Vac and turn off the power output.
- (2) Set the load below the rated current of each output to disable the load.
- (3) Connect the N terminal of the power supply to the CN1-1: AC (N) terminal and the L terminal to the CN1-2: AC (L) terminal with a pair of wires.
- (4) Connect load to VOUT terminal from the positive terminal and to GND terminal with a pair of wires.
- (5) When connecting a power meter, connect as follows. (For details, refer to the User's Manual of the electricity meter you are using.)
- (6) Connect the positive terminal of the DC voltmeter to VOUT terminal and the negative terminal to GND terminal for output voltage measurement.
- (7) AC power supply switch is ON.
- (8) Make sure that the DC voltmeter reading is at the set voltage (20 V).
- (9) Electronic load switch is ON.

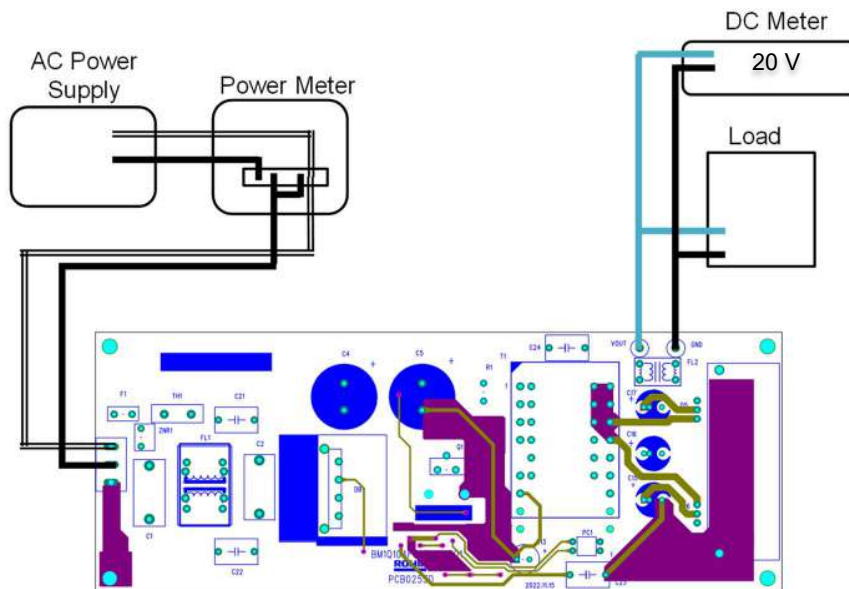

Figure 3. Diagram of How to Connect

## Application Circuit

This evaluation board operates in Quasi-Resonant method.

The output (20 V) voltage is monitored by a feedback circuit and feed back to the FB pin of BM1Q104FJ through a opto - coupler.

At startup, the voltage at the VCC pin rises as the voltage is supplied from the VH pin to the VCC pin through the start circuit.

When the VCC pin voltage exceeds the UVLO release voltage of 13.5 V (Typ), the BM1Q104FJ starts operating.

After start of switching, the startup circuit is turned off and it cut the supply from the VH pin, in order to have low power consumption for instance in standby mode.

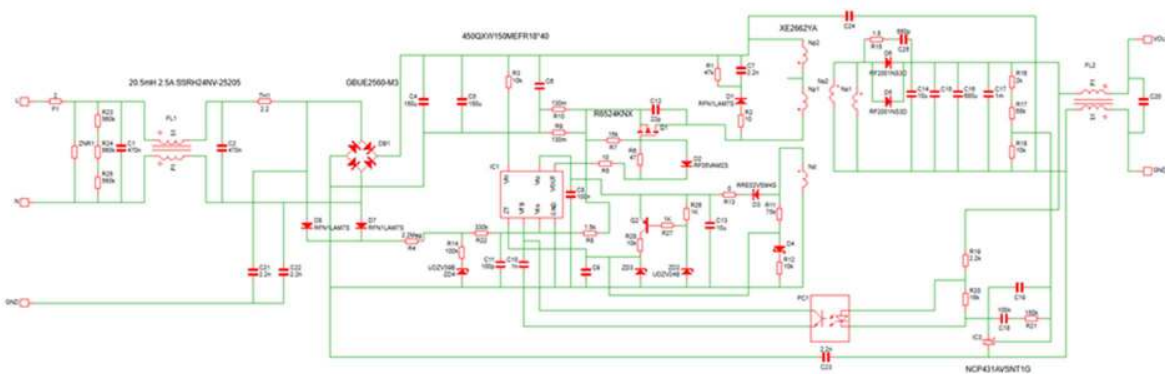

Figure 4. Application Circuit

## BM1P104FJ General Description

### Features

- Quasi-Resonant method
- Built-in 650V tolerate starter Circuit
- Low consumption Power in Light load
- Bottom skip control
- Sound of transformer reduction function
- VCC Pin Under-Voltage Protection
- Over-current protection (cycle-by-cycle)
- OUT pin : H voltage protection
- Soft Start
- ZT trigger mask function
- ZT Over voltage protection
- FB Over Load protection (Auto-restart)
- CS pin open protection (Auto-restart)

### Key Specifications

- Operation Power Supply Voltage Range  
 VCC Pin Voltage: 14.0 V to 30.0 V  
 DRAIN Pin Voltage: 650 V (Max)
- Current at Switching Operation: 0.60 mA (Typ)
- Current at Burst Operation: 0.37 mA (Typ)
- Operation Temperature Range -40 °C ~ +105 °C

### Package

SOP-J8

W (Typ) x D (Typ) x H (Max)

6.00 mm x 4.90 mm x 1.65 mm

Pitch: 1.27 mm (Typ)

### Pin Configuration

Figure 5. Pin Configuration

### Applications

Printer, AC adapter, Copy machine etc

### Pin Descriptions

Table 1. BM1Q104FJ Pin Configuration

No.	Pin Name	I/O	Function
1	ZT	I	Zero current detect pin
2	FB	I	Feedback signal input pin
3	CS	I	Primary current sensing pin
4	GND	I/O	GND pin
5	OUT	O	External MOS drive pin
6	VCC	I/O	Power supply pin
7	N.C.	-	Non Connection pin
8	VH	I	Starter circuit pin

## Notes

- 1) The information contained herein is subject to change without notice.
- 2) Before you use our Products, please contact our sales representative and verify the latest specifications :
- 3) Although ROHM is continuously working to improve product reliability and quality, semiconductors can break down and malfunction due to various factors.  
Therefore, in order to prevent personal injury or fire arising from failure, please take safety measures such as complying with the derating characteristics, implementing redundant and fire prevention designs, and utilizing backups and fail-safe procedures. ROHM shall have no responsibility for any damages arising out of the use of our Products beyond the rating specified by ROHM.
- 4) Examples of application circuits, circuit constants and any other information contained herein are provided only to illustrate the standard usage and operations of the Products. The peripheral conditions must be taken into account when designing circuits for mass production.
- 5) The technical information specified herein is intended only to show the typical functions of and examples of application circuits for the Products. ROHM does not grant you, explicitly or implicitly, any license to use or exercise intellectual property or other rights held by ROHM or any other parties. ROHM shall have no responsibility whatsoever for any dispute arising out of the use of such technical information.
- 6) The Products specified in this document are not designed to be radiation tolerant.
- 7) For use of our Products in applications requiring a high degree of reliability (as exemplified below), please contact and consult with a ROHM representative : transportation equipment (i.e. cars, ships, trains), primary communication equipment, traffic lights, fire/crime prevention, safety equipment, medical systems, servers, solar cells, and power transmission systems.
- 8) Do not use our Products in applications requiring extremely high reliability, such as aerospace equipment, nuclear power control systems, and submarine repeaters.
- 9) ROHM shall have no responsibility for any damages or injury arising from non-compliance with the recommended usage conditions and specifications contained herein.
- 10) ROHM has used reasonable care to ensure the accuracy of the information contained in this document. However, ROHM does not warrants that such information is error-free, and ROHM shall have no responsibility for any damages arising from any inaccuracy or misprint of such information.
- 11) Please use the Products in accordance with any applicable environmental laws and regulations, such as the RoHS Directive. For more details, including RoHS compatibility, please contact a ROHM sales office. ROHM shall have no responsibility for any damages or losses resulting non-compliance with any applicable laws or regulations.
- 12) When providing our Products and technologies contained in this document to other countries, you must abide by the procedures and provisions stipulated in all applicable export laws and regulations, including without limitation the US Export Administration Regulations and the Foreign Exchange and Foreign Trade Act.
- 13) This document, in part or in whole, may not be reprinted or reproduced without prior consent of ROHM.

Thank you for your accessing to ROHM product informations.  
More detail product informations and catalogs are available, please contact us.
