## US2:17HUG92BS

Non-reversing motor starter Size 3 Three phase full voltage Solid-state overload relay OLRelay amp range 25-100A 24Vdc coil Combination type 100A non-fusible disconnect Enclosure NEMA type 1 Indoor general purpose use Standard width enclosure

Fi	gur	es	imi	lar

product brand name	Class 17 & 25	
design of the product	Full-voltage non-reversing motor starter with non-fusible disconnect	
special product feature	ESP200 overload relay	
General technical data		
Height x Width x Depth [in]	24 × 20 × 8 in	
touch protection against electrical shock	(NA for enclosed products)	
installation altitude [ft] at height above sea level maximum	6560 ft	
ambient temperature [°F]		
<ul> <li>during storage</li> </ul>	-22 +149 °F	
during operation	-4 +104 °F	
ambient temperature		
<ul> <li>during storage</li> </ul>	-30 +65 °C	
<ul> <li>during operation</li> </ul>	-20 +40 °C	
Horsepower ratings		
yielded mechanical performance [hp] for 3-phase AC motor		
• at 200/208 V rated value	20 hp	
<ul> <li>at 220/230 V rated value</li> </ul>	25 hp	
<ul> <li>at 460/480 V rated value</li> </ul>	50 hp	
<ul> <li>at 575/600 V rated value</li> </ul>	50 hp	
Contactor		
size of contactor	NEMA controller size 3	
number of NO contacts for main contacts	3	
operational current at AC at 600 V rated value	90 A	
mechanical service life (switching cycles) of the main contacts typical	500000	
Auxiliary contact		
number of NC contacts at contactor for auxiliary contacts	0	
number of NO contacts at contactor for auxiliary contacts	1	
number of total auxiliary contacts maximum	7	
contact rating of auxiliary contacts of contactor according to UL	10A@600VAC (A600), 5A@600VDC (P600)	
Coil		
type of voltage of the control supply voltage	DC	
control supply voltage		
at DC rated value	24 V	
holding power at AC minimum	0 W	
apparent pick-up power of magnet coil at AC	0 VA	
apparent holding power of magnet coil at AC	0 VA	

operating range factor control supply voltage rated value	0.85 1.1	
of magnet coil		
Overload relay		
product function		
<ul> <li>overload protection</li> </ul>	Yes	
<ul> <li>phase failure detection</li> </ul>	Yes	
<ul> <li>asymmetry detection</li> </ul>	Yes	
<ul> <li>ground fault detection</li> </ul>	Yes	
<ul> <li>test function</li> </ul>	Yes	
external reset	Yes	
reset function	Manual, automatic and remote	
trip class	CLASS 5 / 10 / 20 (factory set) / 30	
adjustable current response value current of the current- dependent overload release	25 100 A	
make time with automatic start after power failure	3 s	
maximum	4.0/	
relative repeat accuracy	1%	
product feature protective coating on printed-circuit board	Yes	
number of NC contacts of auxiliary contacts of overload relay	1	
number of NO contacts of auxiliary contacts of overload relay	1	
operational current of auxiliary contacts of overload relay		
• at AC at 600 V	5 A	
• at DC at 250 V	1A	
contact rating of auxiliary contacts of overload relay according to UL	5A@600VAC (B600), 1A@250VDC (R300)	
insulation voltage (Ui)		
<ul> <li>with single-phase operation at AC rated value</li> </ul>	600 V	
<ul> <li>with multi-phase operation at AC rated value</li> </ul>	300 V	
Disconnect Switch		
Disconnect Switch response value of switch disconnector	100A / 600V	
response value of switch disconnector design of fuse holder	100A / 600V non-fusible	
response value of switch disconnector		
response value of switch disconnector design of fuse holder	non-fusible	
response value of switch disconnector design of fuse holder operating class of the fuse link	non-fusible	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure	non-fusible non-fusible	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating	non-fusible non-fusible 1	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing	non-fusible non-fusible 1	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position	non-fusible non-fusible 1 indoors, usable on a general basis vertical	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position         fastening method	non-fusible non-fusible 1 indoors, usable on a general basis	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position         fastening method	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         temperature of the conductor for supply maximum	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         temperature of the conductor for supply maximum         permissible	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C AL or CU	
response value of switch disconnector         design of fuse holder         operating class of the fuse link         Enclosure         degree of protection NEMA rating         design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         temperature of the conductor for supply maximum         permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         type of electrical connection for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         type of connectable conductor cross-sections at AWG         cables for load-side outgoing feeder single or multi-	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C AL or CU Box lug	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder single or multi- stranded temperature of the conductor for load-side outgoing feeder maximum permissible	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf-in 75 °C AL or CU Box lug 120 120 lbf-in	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder maximum permissible	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C AL or CU Box lug 120 120 lbf·in 1x (14 2/0 AWG) 75 °C AL or CU	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder type of electrical connection of magnet coil	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C AL or CU Box lug 120 120 lbf·in 1x (14 2/0 AWG) 75 °C	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder maximum permissible	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C AL or CU Box lug 120 120 lbf·in 1x (14 2/0 AWG) 75 °C AL or CU	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor cross-sections of magnet coil at AWG cables single or multi-stranded	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C AL or CU Box lug 120 120 lbf·in 1x (14 2/0 AWG) 75 °C AL or CU Screw-type terminals	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder temperature of the conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of no load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of no load-side outgoing feeder type of electrical connection for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor cross-sections of magnet	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf-in 75 °C AL or CU Box lug 120 120 lbf-in 1x (14 2/0 AWG) 75 °C AL or CU Screw-type terminals 5 12 lbf-in	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder type of electrical connection of nond-side outgoing feeder type of electrical connection for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor cross-sections of magnet coil at AWG cables single or multi-stranded temperature of the conductor at magnet coil maximum	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf·in 75 °C AL or CU Box lug 120 120 lbf·in 1x (14 2/0 AWG) 75 °C AL or CU Screw-type terminals 5 12 lbf·in 2x (16 12 AWG)	
response value of switch disconnector design of fuse holder operating class of the fuse link Enclosure degree of protection NEMA rating design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder tightening torque [lbf-in] for load-side outgoing feeder type of connectable conductor cross-sections at AWG cables for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder type of electrical connection of magnet coil tightening torque [lbf-in] at magnet coil type of connectable conductor cross-sections of magnet coil at AWG cables single or multi-stranded temperature of the conductor at magnet coil maximum permissible	non-fusible non-fusible 1 indoors, usable on a general basis vertical Surface mounting and installation Box lug 120 120 lbf-in 75 °C AL or CU Box lug 120 120 lbf-in 1x (14 2/0 AWG) 75 °C AL or CU Screw-type terminals 5 12 lbf-in 2x (16 12 AWG) 75 °C	

type of connectable conductor cross-sections at contactor at AWG cables for auxiliary contacts single or multi- stranded	1x (12 AWG), 2x (16 14 AWG), 2x (18 16 AWG)
temperature of the conductor at contactor for auxiliary contacts maximum permissible	75 °C
material of the conductor at contactor for auxiliary contacts	CU
type of electrical connection at overload relay for auxiliary contacts	Screw-type terminals
tightening torque [lbf·in] at overload relay for auxiliary contacts	7 10 lbf·in
type of connectable conductor cross-sections at overload relay at AWG cables for auxiliary contacts single or multi- stranded	2x (20 14 AWG)
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C
material of the conductor at overload relay for auxiliary contacts	CU
Short-circuit current rating	
design of the fuse link for short-circuit protection of the main circuit required	10kA@600V (Class H or K); 100kA@600V (Class R or J)
certificate of suitability	NEMA ICS 2; UL 508; CSA 22.2, No.14
Eurtherinformation
