12. Recommended Derating for Rated Current

This fuse will recommend use by the current reduction value according to the following derating curve.

- Nominal Derating

Nominal Derating \leq 75% of Rated Current

- Temperature Derating

Please refer to the following graph regarding the current derating value for ambient temperature.

Ex.) If SBF32 801 (Rated Current 8.0A) is used under ambient temperature 70°C,

Kamaya recommends, less than the current value derated as below,

Rated Current : $8.0A \times (\text{Nominal Derating} : 75\% \times \text{Temperature Derating} : 80\%) = 4.8A$
