## Data sheet

## US2:14EUE820J

Non-reversing motor starter, Size 1 3/4, Three phase full voltage, Solid-state overload relay, OLRelay amp range 10-40a, 24VAC 50-60HZ coil, Non-combination type, Enclosure type 12, Dust/drip proof for indoors, Extra-wide enclosure

product brand name	Class 14
design of the product	Full-voltage non-reversing motor starter
special product feature	ESP200 overload relay; Half-size starter
General technical data	
weight [lb]	15 lb
Height x Width x Depth [in]	13 × 13 × 5 in
touch protection against electrical shock	(NA for enclosed products)
installation altitude [ft] at height above sea level maximum	6560 ft
ambient temperature [°F]	
during storage	-22 +149 °F
during operation	-4 +104 °F
ambient temperature	
during storage	-30 +65 °C
during operation	-20 +40 °C
country of origin	USA
Horsepower ratings	
yielded mechanical performance [hp] for 3-phase AC motor	
• at 200/208 V rated value	10 hp
• at 220/230 V rated value	10 hp
<ul> <li>at 460/480 V rated value</li> </ul>	15 hp
• at 575/600 V rated value	15 hp
Contactor	
size of contactor	Controller half size 1 3/4
number of NO contacts for main contacts	3
operating voltage for main current circuit at AC at 60 Hz maximum	600 V
operational current at AC at 600 V rated value	40 A
mechanical service life (operating cycles) of the main contacts typical	1000000
Auxiliary contact	
number of NC contacts at contactor for auxiliary contacts	0
number of NO contacts at contactor for auxiliary contacts	1
number of total auxiliary contacts maximum	8
contact rating of auxiliary contacts of contactor according to UL	10A@600VAC (A600), 5A@600VDC (P600)
Coil	
type of voltage of the control supply voltage	AC
control supply voltage	
• at AC at 50 Hz rated value	24 V
• at AC at 60 Hz rated value	24 V
holding power at AC minimum	8.6 W
apparent pick-up power of magnet coil at AC	218 VA

apparent holding power of magnet coil at AC	25 VA
operating range factor control supply voltage rated value of	0.85 1.1
magnet coil	0.05 1.1
percental drop-out voltage of magnet coil related to the input voltage	50 %
ON-delay time	19 29 ms
OFF-delay time	10 24 ms
Overload relay	
product function	
<ul> <li>overload protection</li> </ul>	Yes
<ul> <li>phase failure detection</li> </ul>	Yes
<ul> <li>asymmetry detection</li> </ul>	Yes
ground fault detection	Yes
test function	Yes
external reset	Yes
reset function	Manual, automatic and remote
trip class	CLASS 5 / 10 / 20 (factory set) / 30
adjustable current response value current of the current- dependent overload release	10 40 A
tripping time at phase-loss maximum	3 s
relative repeat accuracy	1 %
product feature protective coating on printed-circuit board	Yes
number of NC contacts of auxiliary contacts of overload relay	1
number of NO contacts of auxiliary contacts of overload relay	1
operational current of auxiliary contacts of overload relay	
• at AC at 600 V	5 A
• at DC at 250 V	1 A
contact rating of auxiliary contacts of overload relay according to UL	5A@600VAC (B600), 1A@250VDC (R300)
insulation voltage (Ui)	
<ul> <li>with single-phase operation at AC rated value</li> </ul>	600 V
<ul> <li>with multi-phase operation at AC rated value</li> </ul>	300 V
Enclosure	
design of the housing	Extra-wide
degree of protection NEMA rating of the enclosure	Extra-wide NEMA Type 12
degree of protection NEMA rating of the enclosure design of the housing	Extra-wide NEMA Type 12 Dust tight and drip proof for indoors
design of the housing	
design of the housing Mounting/wiring	Dust tight and drip proof for indoors
design of the housing Mounting/wiring mounting position	Dust tight and drip proof for indoors Vertical
design of the housing Mounting/wiring mounting position fastening method	Dust tight and drip proof for indoors Vertical Surface mounting and installation
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side	Dust tight and drip proof for indoors Vertical Surface mounting and installation Screw-type terminals
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf-in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded temperature of the conductor for load-side outgoing feeder	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded         temperature of the conductor for load-side outgoing feeder         type of reactable conductor for load-side outgoing feeder         temperature of the conductor for load-side outgoing feeder         maximum permissible	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded temperature of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU
design of the housing Mounting/wiring mounting position fastening method type of electrical connection for supply voltage line-side tightening torque [lbf·in] for supply type of connectable conductor cross-sections at line-side for AWG cables single or multi-stranded temperature of the conductor for supply maximum permissible material of the conductor for supply type of electrical connection for load-side outgoing feeder tightening torque [lbf·in] for load-side outgoing feeder type of connectable conductor cross-sections for AWG cables for load-side outgoing feeder single or multi-stranded temperature of the conductor for load-side outgoing feeder type of connectable conductor for load-side outgoing feeder type of the conductor for load-side outgoing feeder maximum permissible material of the conductor for load-side outgoing feeder type of electrical connection of magnet coil	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         screw-type terminals
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of connectable conductor cross-sections for AWG cables         for load-side outgoing feeder         type of connectable conductor for load-side outgoing feeder         type of connectable conductor for load-side outgoing feeder         temperature of the conductor for load-side outgoing feeder         material of the conductor for load-side outgoing feeder         material of the conductor for load-side outgoing feeder         material of the conductor for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil         tightening torque [lbf·in] at magnet coil	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         screw-type terminals         5 12 lbf-in
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of connectable conductor cross-sections for AWG cables         for load-side outgoing feeder single or multi-stranded         temperature of the conductor for load-side outgoing feeder         type of cleater of the conductor for load-side outgoing feeder         material of the conductor for load-side outgoing feeder         material of the conductor for load-side outgoing feeder         type of electrical connection of magnet coil         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor cross-sections of magnet coil for         AWG cables single or multi-stranded         temperature of the conductor at magnet coil maximum	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         screw-type terminals         5 12 lbf-in         2 x (16 - 12 AWG)
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf-in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         tightening torque [lbf-in] for load-side outgoing feeder         type of connectable conductor for load-side outgoing feeder         type of connectable conductor for load-side outgoing feeder         maximum permissible         material of the conductor for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf-in] at magnet coil         type of connectable conductor cross-sections of magnet coil for         AWG cables single or multi-stranded         temperature of the conductor at magnet coil maximum         permissible	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf-in         1x(14 - 2 AWG)         75 °C         AL or CU         screw-type terminals         5 12 lbf-in         2 x (16 - 12 AWG)         75 °C
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of connectable conductor for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of connectable conductor for load-side outgoing feeder         maximum permissible         material of the conductor for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor cross-sections of magnet coil for         AWG cables single or multi-stranded         temperature of the conductor at magnet coil maximum         tightening torque [lbf·in] at magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor at magnet coil maxim	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         screw-type terminals         5 12 lbf·in         2 x (16 - 12 AWG)         75 °C         CU
design of the housing         Mounting/wiring         mounting position         fastening method         type of electrical connection for supply voltage line-side         tightening torque [lbf·in] for supply         type of connectable conductor cross-sections at line-side for         AWG cables single or multi-stranded         temperature of the conductor for supply maximum permissible         material of the conductor for supply         type of electrical connection for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         tightening torque [lbf·in] for load-side outgoing feeder         type of connectable conductor cross-sections for AWG cables         for load-side outgoing feeder single or multi-stranded         temperature of the conductor for load-side outgoing feeder         maximum permissible         material of the conductor for load-side outgoing feeder         type of electrical connection of magnet coil         tightening torque [lbf·in] at magnet coil         type of connectable conductor cross-sections of magnet coil for         AWG cables single or multi-stranded         temperature of the conductor at magnet coil maximum         permissible         material of the conductor at magnet coil         type of electrical connection for auxiliary contacts <td>Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         screw-type terminals         5 12 lbf·in         2 x (16 - 12 AWG)         75 °C         CU         screw-type terminals</td>	Dust tight and drip proof for indoors         Vertical         Surface mounting and installation         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         Screw-type terminals         45 45 lbf·in         1x(14 - 2 AWG)         75 °C         AL or CU         screw-type terminals         5 12 lbf·in         2 x (16 - 12 AWG)         75 °C         CU         screw-type terminals

maximum permissible	
material of the conductor at contactor for auxiliary contacts	CU
type of electrical connection at overload relay for auxiliary contacts	screw-type terminals
tightening torque [lbf·in] at overload relay for auxiliary contacts	7 10 lbf·in
type of connectable conductor cross-sections at overload relay for AWG cables for auxiliary contacts single or multi-stranded	2 x (20 - 14 AWG)
temperature of the conductor at overload relay for auxiliary contacts maximum permissible	75 °C
material of the conductor at overload relay for auxiliary contacts	CU
Short-circuit current rating	
design of the fuse link for short-circuit protection of the main circuit required	10kA@600V (Class H or K); 100kA@600V (Class R or J)
design of the short-circuit trip	Thermal magnetic circuit breaker
maximum short-circuit current breaking capacity (Icu)	
• at 240 V	14 kA
• at 480 V	10 kA
• at 600 V	10 kA
