【1. 適用範囲 SCOPE】

本仕様書は、 \_\_\_\_\_ 殿 に納入する  
0.5mmピッチ FPC用コネクタ について規定する。  
This specification covers the 0.5mm PITCH FPC CONNECTOR series.

【2. 製品名称及び型番 PRODUCT NAME AND PART NUMBER】

| 製品名称<br>Product Name  |                 | 製品型番<br>Parts Number |
|---|-----------------|----------------------|
| ハウジング アッセンブリ<br>Housing Assembly (R/A Type, Bottom Contact) | 無鉛<br>LEAD FREE | 54132-**39           |
| 54132-**39テーピング梱包品<br>Embossed Tape Package for 54132-**39  | 無鉛<br>LEAD FREE | 54132-**97           |

\*\* : 図面参照 Refer to the drawing.

【3. 定格 RATINGS】

| 項目<br>Item                           | 規格<br>Standard                |                    |
|--------------------------------------|-------------------------------|--------------------|
| 最大許容電圧<br>Rated Voltage(MAXIMUM)     | 50 V                          | [AC(実効値 rms) / DC] |
| 最大許容電流<br>Rated Current(MAXIMUM)     | 0.5 A                         |                    |
| 使用温度範囲<br>Ambient Temperature Range. | -40°C ~ +85°C <sup>*1,2</sup> |                    |

\*1 : 通電による温度上昇分も含む。

Including terminal temperature rise.

\*2 : 適合FPCも本使用温度範囲を満足すること。

FPC must be meet temperature range specified in this standard.

|                                 |  |             |     |      |  |                           |                           |                            |                               |                               |  |  |                  |  |  |  |  |  |  |

【6. アクチュエータ挿抜力 ACTUATOR INSERTION/WITHDRAWAL FORCE】

下記に示した表は、0.3mm厚のFPCを使用したときのアクチュエータ挿抜力のデータを示しております。ただし、FPCの仕様がアクチュエータ挿抜力に影響を与えるため、下記に示したアクチュエータ挿抜力の仕様を満たさない場合があります。  
Table shown below is a data of actuator insertion/withdrawal force when using a thickness of 0.3mm FPC. But, there's a case which actuator insertion/withdrawal force doesn't fulfill the specification shown below, because FPC specification affects the result of actuator insertion/withdrawal force.

【8. 赤外線リフロー条件 INFRA-RED REFLOW CONDITION】

温度条件グラフ

(温度は基板パターン面)

TEMPERATURE CONDITION GRAPH  
(TEMPERATURE ON BOARD PATTERN SIDE)

注記：本リフロー条件に関しては、温度プロファイル、半田ペースト、大気、N<sub>2</sub>リフロー、基板などにより条件が異なりますので事前に実装評価(リフロー評価)を必ず実施願います。実装条件によっては、製品性能に影響を及ぼす場合があります。  
また吸湿などの前処理は行わないで下さい。

NOTE: Please investigate the mounting condition (reflow soldering condition) on your own devices beforehand. The mounting conditions may change due to the soldering temperature, soldering paste, air reflow machine, Nitrogen reflow machine, and the type of printed writing board. The different mounting conditions may have an influence on the product's performance. No moisture treatment before reflow process.

【9. 注意事項 NOTE】

9-1

本製品の樹脂部に黒点、ウエルド部の線、多少の傷が確認される事がありますが、製品性能には影響ございません。  
Although this product may have a small black mark, a weld line or a scratch on the housing, these will not have any influence on the product's performance.

9-2

本製品のネイルは錫めっきを使用しているため、外観に摺動痕がつく場合がございますが、製品性能に影響はありません。  
Because we plate the shell, terminal and fitting nails with Tin, there may be scratch marks on the surface. However, these scratches will have no influence on the product's performance.

9-3

成形品の色相に多少の違いを生じる場合がありますが、製品性能には影響ありません。  
There may be slight differences in the housing coloring, but there will be no influence on the product's performance.

9-4

紫外線によりハウジングが変色する場合がありますが、製品性能に影響ありません。  
Although the ultraviolet light may potentially change the housing color, this change has no on the product's performance.

9-5

実装性能(平坦度)は、実装基板の反りの影響を含まないものと致します。基板の反りはコネクタ両端部を基準とし、コネクタ中央部にて Max0.02mmとして下さい。The mounting specification for coplanarity does not include the influence of warpage of the printed circuit board. The warpage of the printed circuit board should be a maximum of 0.02mm if measuring from one connector edge to the other.

9-6

本製品の一般性能確認はリジット基板にて実施おります。フレキシブル基板等の特殊な基板へ実装する場合は、事前に実装確認等を行った上でご使用願います。  
The product performance was tested using rigid printed circuit board. In case the product needs to be reflowed onto flexible circuit board, please conduct a reflow test on the flexible circuit board in advance.

9-7

フレキシブル基板に実装する場合は、基板の変形を防止するため、補強板をご使用願います。  
Please add a stiffener on the flexible printed circuit (FPC) when you mount the connector onto FPC in order to prevent deformation of the FPC.

9-8

リフロー条件によっては、樹脂部の変色が発生する場合がありますが、製品性能に影響はございません。  
Depending on the reflow conditions, there may be the possibility of a color change in the housing. However, this color change does not have any effect on the product's performance.

9-9

リフロー後、半田付け部に変色が見られることがありますが、製品性能に影響はありません。Although there might be some discoloration seen on the soldering tail after reflow, this will not influence the product's performance.

PRODUCT SPECIFICATION

LANGUAGE

JAPANESE  
ENGLISH

9-10

半田実装部の未半田は、ターミナル脱落、ピン間ショート、ターミナル座屈、またコネクタの基板からの外れが懸念されます。従って全てのターミナルテール部及び、ネイル部に半田付けを行って下さい。

If you leave any soldering area on this product open, there may be the possibility of a missing terminal short circuiting between pins, terminal buckling or the potential for the connector to come off of the printed circuit board. Therefore, please solder all of the terminals and fitting nails on the printed circuit board.

9-11

実装機によってコネクタに負荷が加わると変形、破損する場合がありますので事前にご確認下さい。

If there is accidental contact with the connector while it is going through the reflow machine, there may be deformation or damage caused to the connector. Please check to prevent this.

9-12

本製品のハウジング材料は耐熱性ナイロンを使用しており、ハウジングの吸水状態、或いは、はんだ付け条件によっては、リフローはんだ付け時にハウジング表面に「ふくれ」が発生する可能性があります。この「ふくれ」に関しましては、ナイロン材の物性変化を伴うものではなく、製品機能を損なうものではありません。

The housing material of this product is made from a high heat resistant Nylon. The soldering condition and the water absorption properties of the housing material may cause blistering on the housing surface.

Because this blister is not caused by property change, it does not damage the product's features.

9-13

コネクタの性能を損なう恐れがある為、コネクタの洗浄は、行わないで下さい。

Please do not conduct any "washing process" on the connector because it may damage the product's function.

9-14

適合するFPCの導体部は、錫系めっき(ニッケル下地)品を使用願います。

Please make sure to use the appropriate FPC which has Tin plating (Nickel under plating) on the contact area.

9-15

量産前にご使用になるFPCとの相性確認を行った上で、ご使用をお願い致します。

Please check the compatibility between the connector and the FPC prior to moving to mass production.

9-16

コネクタにFPCを装着した状態で、FPCに過度の負荷が加わらないようにご注意頂き、御社基板のスペース上、コネクタに負担の掛かる位置への取り付けはしないで下さい。コネクタのロックが解除されたり、FPCの抜け、断線、破損や接触不良の原因になります。特に、連続的に加わる場合はFPCを固定するようにして下さい。また、基板に対して垂直上下方向の引張荷重、コンタクトピッチ方向のこじり荷重を与えない様にご注意願います(図1参照)。

Please pay special attention not to have any pulling force/tension on the FPC when it is inserted into the connector. This can cause; the actuator to be unlocked, the actuator to come off, cut the traces on the FPC, and/or damage the FPC. Please be especially careful to avoid placing the FPC in a location where it will have a constant force applied on the FPC. If necessary, please fix the FPC directly on the chassis. Also, please avoid pulling the FPC vertically or twisting the FPC back and force horizontally while it is inserted in the connector(see figure 1).

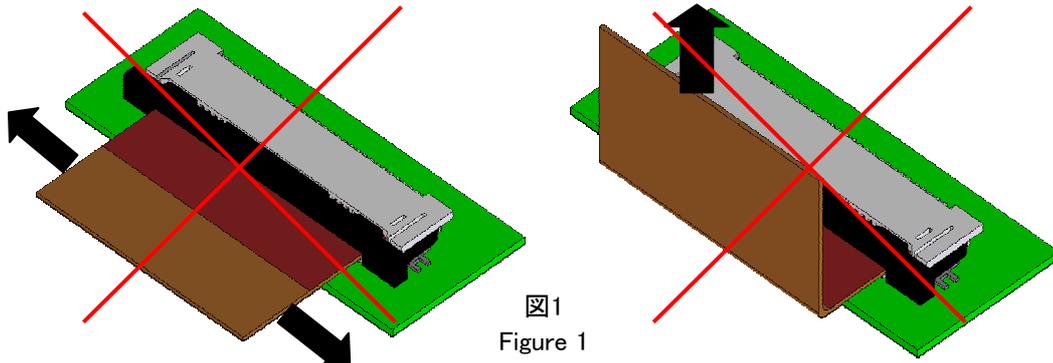

図1  
Figure 1

9-17

本製品をご使用時に取り付けられた電線・プリント基板の共振や、機器の回転構造や可動部分の動作によりコネクタ嵌合部(接点部)が常に動いてしまう状態での御使用は避けて下さい。接触部の摺動磨耗等による接触不良の原因となります。従って、機器内で電線・プリント基板を固定し、共振を抑える等の処置をお願い致します。

Please do not use the connector in a condition where the wire, the printed circuit board, or the contact area is experiencing a sympathetic vibration of wires and printed circuit board, and constant movement of devices. This may cause a defect in the contact due to the contact area being worn down. Therefore, please fix wires and printed circuit board on the chassis, and reduces sympathetic vibration.

9-18

活電状態の電気回路で、挿入、抜去ができることを前提に作られていません。スパーク等による危険の発生、性能不良につながりますので、活電状態での挿入、抜去はしないで下さい。

This product is not designed for the mating and unmating of the connectors to be performed under the condition of an active electrical circuit. It may cause a spark and product defect if the connectors are mated and unmated in this way.

9-19

本製品の端子は錫ビスマスマッキを使用しております。ご使用になるFPCとの相性確認としてウイスキー評価の実施を推奨いたします。

The terminals for this product are tin-bismuth plated. We recommend that a Tin whiskering test is performed between your FPC and the connector beforehand to ensure that they are compatible.

9-20

基板実装後に基板を直接積み重ねない様に注意してください。

Please do not stack the printed circuit board directly after mounted the connector on it.

9-21

基板実装後に基板を直接積み重ねない様に注意してください。Please do not stack the printed circuit board directly after mounted the connector on it.

9-22

基板実装前後に端子、補強金具に触らないでください。

Please do not touch the terminals and fitting nails before not after reflowing the connector onto the printed circuit board.

9-23

FPC挿入する際は、アクチュエータが完全に開いた状態で行い、FPCがハウジングに突き当たるまで確実に挿入して下さい。左右斜めの状態で挿入すると、ピッチずれによるショート不良になったり、角がターミナルに引っ掛かりターミナルの変形やFPC導体めくれに至るケースがあります。

When inserting the FPC into the connector, please ensure that the actuator is completely open during insertion. Please also ensure that the FPC is completely inserted until the end of the FPC touches the housing. Diagonal insertion of the FPC into the connector can cause a short circuit due to the misaligned pitch. Diagonal insertion can also deform the terminal and/or damage the FPC contact area because the FPC edge may contact the terminal.

9-24

アクチュエータの開閉は、コネクタを基板に実装した状態で行って下さい。

Please only open or close the actuator while the connector is mounted on the board.

9-25

アクチュエータ操作時にはピンセット等の先端が鋭利な物は使用しないで下さい。コネクタの破損、半田付け部の損傷の原因になります。

When opening and closing the actuator, please do not use a sharp edged tool such as tweezers. This may cause to damage the connector or to the soldering area.

9-26

アクチュエータを開ける際は、左右均等に力が加わるように両端部を引いて操作して下さい。荷重が一点に集中するような片側に偏った位置での操作は行わないで下さい。コネクタの破損の原因になります(図2参照)。

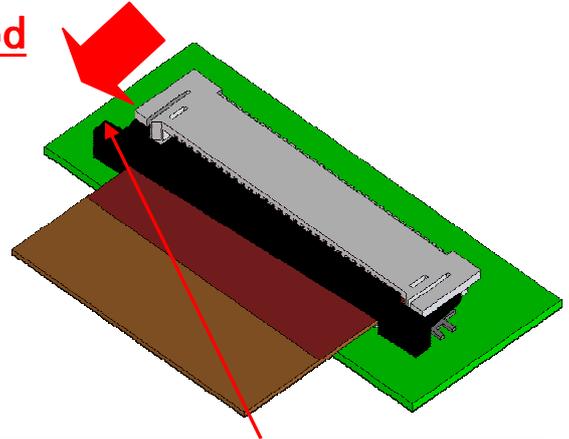

When locking the actuator, please push the actuator by applying a force to the both sides of actuator. Please do not apply a force to only one side of actuator because it may cause to damage the connector (see figure 2).

OK

アクチュエータの両側での操作  
Withdrawing on both sides of actuator

No Good

アクチュエータの片側だけの操作  
Withdrawing Pushing only one side of actuator

9-28

FPCを抜く時は、アクチュエータが完全に開いた状態で行って下さい。万が一、アクチュエータが完全に開いていない状態でFPCを抜いた時は、コンタクト部に付着物が無いか確認の上、再装着願います。

When withdrawing the FPC, please make sure that the actuator is completely open. If the FPC is withdrawn without the actuator being fully open, please check to make sure that there is no debris on the contact area before inserting the FPC again.

9-29

嵌合後、コネクタピッチ方向、スパン方向及び回転方向への負荷がかかるような動作またはセットはしないでください。コネクタ破壊やはんだクラックを引き起こします。

After mated the connector, please do not allow the printed circuit boards to apply pressure on the connector in either the pitch direction or the span direction. It may cause damage to the connector and may crack the soldering.

9-30

実装後において半田こてによる手修正を行う際は、必ず仕様書掲載の条件以内で行って下さい。条件を超えて実施した場合、端子の抜け、接点ギャップの変化、モールドの変形、溶融等、破損の原因になります。

When conducting manual repairs using a soldering iron, please follow the soldering conditions shown in the product specification. If the conditions in the product spec are not followed, it may cause the terminals to fall off, a change in the contact gap, a deformation of the housing, melting of the housing, and damage the connector.

9-31

半田こてによる手修正を行なう際、過度の半田やフラックスを使用しないで下さい。半田上がりやフラックス上がりにより接触、機能不良に至る場合があります。

When conducting manual repairs using a soldering iron, please do not use more solder and flux than needed. This may cause solder wicking and flux wicking issues, and it will eventually cause a contact defect and functional issues.
