3M™ Rugged Anti-Scratch (RAS) Coating

Emerging from a rich heritage of advanced coating innovation, 3M introduces Rugged Anti-Scratch (RAS) super hard coat for non-prescription safety eyewear lenses. RAS helps provide protection against scratches in the toughest of environments.

With at least four times more scratch resistance than any other hard coat on 3M non-prescription safety eyewear, you'll see a clear difference when it comes to durability and longer lens life – which leads to lower costs.

Get a Clear Look at Durability and Value

RAS super hard coat leverages over 30 years of 3M coating chemistry expertise to offer long-lasting lens protection that's clearly different. Scientifically engineered by 3M, RAS is an advanced anti-scratch lens coating designed to enhance eyewear performance in rugged, abrasive, environments. RAS-coated lenses are designed to help stand up to the rigors of a wide range of applications such as sanding, sawing, milling, machining, masonry, power fastening, buffing and mining.*

RAS Takes Eyewear Performance to the Next Level

- At least four times more scratch resistance than any other hard coat on 3M non-prescription safety eyewear
- Helps keeps lenses clear, longer
- Helps lowers replacement costs by extending the life of the lens
- Helps protect the lens from many chemicals
- Meets the requirements of CSA Z94.3-2007 and the High Impact Requirements of ANSI Z87.1-2010

* An eye hazard assessment must be conducted by qualified personnel in order to properly select the appropriate eyewear for each application.
