REDEFINING SECURITY

The Kendall Howard™ ESD Cabinet provides technicians in static control environments an ESD safe storage solution for protecting sensitive components across a multitude of industries. Designed with versatility and protection in mind. Our fully enclosed cabinet is equipped with locking split-entry doors to ensure sensitive equipment is safe. The cabinet is complete with a fully integrated louvered panel system featuring 153 louvered cut outs for mounting additional accessories.

Aluminum Grounding Boot

ESD cabinets must be grounded one of two ways. One grounding option is with a 10' common ground wire to an external earth ground. The second is built directly into the rear leg levelers with our unique aluminum boot for use with ESD safe flooring.

Louvered Panel System

This integrated louvered panel system offers ample locations to install ESD bins, louvered panel accessories or any of the proprietary Kendall Howard ESD shelves, drawers, or pegboards.
