KSZ9897 Switch Evaluation Board with LAN7801 & KSZ9031

Part Number: EVB-KSZ9897

The EVB-KSZ9897 Evaluation Board supports evaluation of the KSZ9897 7-Port Gigabit Ethernet Switch in un-managed mode. The fully featured board has 5 RJ-45 sockets with the two remaining ports being connected to a KSZ9031 PHY and a LAN7801 USB to Ethernet Bridge. The board has connectivity for the MIIM PHY management bus, and also allows for in-band access to registers via the USB Bridge.

Features

- o Six Ethernet Ports
- o One USB Port
- o KSZ9897 Gigabit Ethernet Switch
- o KSZ0931 Gigabit PHY
- o LAN7801 USB to Gigabit Etherent Bridge
