#### NOTES:

- 1. Test in anechoic room and use the IEC standard baffler which size at: 1350 mm (W) X 1650 mm (H)
- 2. Test should be made under the conditions of room temperature ( $20 \pm 10$  °C), relative humidity ( $60 \pm 20$ %) and normal atmospheric pressure. In this case, however, that the judgment is questionable, the test conditions are to be changed to room temperature  $20 \pm 2$  °C, relative humidity  $60 \sim 70$ % and normal atmospheric pressure.
