

Feather Stackable Header Kit

PRT-15187 ROHS

These stackable headers are made to work with the SparkFun ESP32 Thing Plus to connect to shield with a Feather footprint. This set includes one 12-pin and one 16-pin header; the pins are spaced by 0.1".

Each set of headers allows you to stack Feather shields on top of your ESP32 Thing Plus or plug them into a solderless breadboard.

Note: Soldering is required for functionality and physical attachment to a Feather shield or board.

INCLUDES

- One 12-pin header
- One 16-pin header
