

SFP

Single Port Multi-Port Ganged

Amphenol's SFP connector series is a 20 position connector and cage combo for mounting to a host PCB with a metal cage enclosing the connector. These connectors are similar to the Gigabit Interface Converter Interface (GBIC), but they are smaller in size and operate at much faster data transfer rates.

Amphenol single port and stacked versions are rated up to 10 Gbps. They are available in standard RoHS compliant or non-RoHS compliant versions. The cages are a one-piece construction with enhanced transceiver mating tabs presently available in press-fit version, with solder version and longer or shorter pins available as custom options.

Applications

- Fibre Channel
- Gigabit Ethernet
- InfiniBand™
- Servers
- Routers
- Storage Devices
- Switches
- Optical Devices
- Networking Devices
