

The EverSet ES100-MOD carrier board is a small PCB that breaks out the contacts of the [ES100-MOD](#) (castellated holes) to a 6-pin male connector.

Assembled to the carrier board, the ES100-MOD Module can be used for example on a solderless [breadboard](#).

The carrier board is a DIY Kit that needs some soldering. It includes the PCB, a 1×6 male header strip, and a 4-pole screw terminal for the antenna connection.
