Notes 1. μPD70F3454, 14 × 14 mm and 10 × 10 mm packages only.

2. μPD70F3454 only.

Remark POC: Power-on clear circuit

LVI: Low-voltage detector

CLM: Clock monitor

In-circuit emulator
Emulation board

Remark LVI: Low-voltage detector, CLM: Clock monito

Notes 1. μ PD70F3824 only.

2. Contains an 8 KB area for data use only.

Remark LVI: Low-voltage detector

CLM: Clock monitor

Notes 1. Contains a 16 KB area for data use only.

2. Contains a 64 KB area for data use only.

3. "PD70E3837 only"

* Under development

Remark LVI: Low-voltage detector
CLM: Clock monitor

* Under development

* A free evaluation version is also available for the coding tools and flash programming software (Renesas Flash Programmer).

■ V850 Development Tool Lineup

MCU	Real-time OS	Software Tools	Emulators		Programming Tools
			On-chip debugging emulator	Full-spec emulator	
V850	RI850V4 ¹ RI850MP (V850E2M Dual Core)	Integrated Development Environment CubeSuite+ for V850 (includes integrated development environment ² , compiler, simulator, and emulator debugger)	E1 ⁴ MINICUBE2 MINICUBE (JTAG emulator for V850)	IECUBE IECUBE2	PG-FP5 ⁶ E1 ^{4,7} MINICUBE2 ^{7,8}
		Software Package for V850 [SP850] (includes integrated development environment ³ , compiler, simulator, and emulator debugger)			

Notes:

1. Some MCUs support the RX850V4 real-time OS instead.

2. The integrated development environment is CubeSuite+.

3. The integrated development environment is the project manager PM+.

4. The E20 emulator may be used as well, but the supported debugging functions are equivalent to those of the E1.

5. This is a programmer for flash MCUs from Renesas. For details about which programmers can be used with each MCU and the programmer specifications, see the Renesas website (<http://www.renesas.com/programmer>).

6. Used together with a programming GUI (provided free of charge).

7. Used together with the programming software Renesas Flash Programmer (a free evaluation version is available).

8. Used together with the programming software QB-Programmer (provided free of charge).

* CubeSuite+ is not generally promoted to the U.S. and European customers. Customers in the U.S. and Europe who are interested in CubeSuite+ are requested to contact our regional marketing departments for details.

* For details about which emulators can be used with each MCU and emulator specifications, see the Renesas website (http://www.renesas.com/emulation_debugging). The emulator that can be used might differ depending on the MCU part number.

CPU Board

This CPU board is used to evaluate the operation of a V850 MCU by using the on-chip debugging emulator E1 or MINICUBE2 (each sold separately). By using this board, you can evaluate a series of development processes from program development to actual operation.

All MCU pins are assigned to peripheral board connectors, letting you create evaluation circuits using a commercially available universal board.

QB-F14T16-01

* A 14-/16-pin conversion adapter QB-F14T16-01 (sold separately) is required when connecting an E1 emulator to a CPU board that has a connector for the MINICUBE2 emulator.

Extensive Renesas Development Ecosystem

A wide variety of products for the V850 family, such as compilers and programmers, are available from partner tool vendors. These products enable the V850 family to be used in an even broader range of applications.

Notes:

1. The information included in this document is current as of the date this document is issued. Such information, however, is subject to change without any prior notice. Before purchasing or using any Renesas products listed herein, please confirm the latest product information with a Renesas Electronics sales office. Also, please pay regular and careful attention to additional and different information to be disclosed by Renesas Electronics such as that disclosed through our website.
2. Renesas Electronics does not assume any liability for infringement of patents, copyrights, or other intellectual property rights of third parties by or arising from the use of Renesas Electronics products or technology described in this document. Any patent, copyright, or other intellectual property rights, as granted hereby under any patents, copyrights or other intellectual property rights of Renesas Electronics or others.
3. You should not alter, modify, copy, or otherwise misappropriate any Renesas Electronics product, whether in whole or in part.
4. Descriptions of circuits, software and other related information in this document are provided only to illustrate the operation of semiconductor products and application examples. You are fully responsible for the incorporation of these circuits, software, and information in the design of your equipment. Renesas Electronics assumes no responsibility for any losses incurred by you or third parties arising from the use of these circuits, software, or information.
5. You acknowledge that the technology described in this document, you should comply with the applicable environmental laws and regulations and follow the procedures required by such laws and regulations. You should not use Renesas Electronics products or the technology described in this document for any purpose related to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology may not be used for or incorporated into any products or systems whose manufacture, use, or sale is prohibited under any applicable domestic or foreign laws or regulations.
6. Renesas Electronics products and technology described in this document do not contain any information that would violate any applicable laws or regulations. Renesas Electronics assumes no liability whatsoever for any damages incurred by you resulting from errors in this document, or from the information included herein.
7. Renesas Electronics products are classified according to the following three quality grades: "Standard", "High Quality", and "Specific". The recommended application for each Renesas Electronics product is indicated in the document. You should use Renesas Electronics products or the technology described in this document for any purpose related to military applications or use by the military, including but not limited to the development of weapons of mass destruction. Renesas Electronics products and technology shall not be in any way liable for any damages or losses incurred by you or third parties arising from the use of any Renesas Electronics products for an application categorized as "Specific" or "Standard" which the product was intended where you have failed to obtain the prior written consent of Renesas Electronics. The grade of each Renesas Electronics product is "Standard" unless otherwise expressly specified in a Renesas Electronics data sheet or other documentation.
"Standard": Computers; office equipment; communications equipment; test and measurement equipment; audio and visual equipment; home electronic appliances; machine tools; personal electronic equipment; and industrial robots.
"High Quality": Industrial control equipment (e.g., robots, trains, ships, etc.); traffic control systems; anti-disaster systems; anti-crime systems; safety equipment; and medical equipment not specifically designed for life support.
"Specific": Aircraft; aerospace equipment; submersible equipment; nuclear reactor; medical implants; or systems for life support (e.g., artificial heart, implants or systems for life support).
8. You should use Renesas Electronics products and technology described in this document within the ranges specified by Renesas Electronics, especially with respect to the maximum rating, operating supply voltage range, movement power voltage range, heat radiation characteristics, installation and other product characteristics. Renesas Electronics shall have no liability for malfunctions or damages arising out of the use of Renesas Electronics products beyond such specified ranges.
9. Renesas Electronics products have specific characteristics such as the occurrence of failure at a certain rate and malfunctions under certain use conditions. Further, Renesas Electronics products are not subject to radiation resistance design. Please be sure to implement safety measures to guard them against the possibility of physical injury, and injury or damage caused by fire in the event of the failure of a Renesas Electronics product, such as safety design for hardware and software including but not limited to the use of fire detection or fire extinguishing systems, and aging degradation or any other appropriate measures. Because the evaluation of microcomputer software alone is very difficult, please evaluate the safety of the final products or system manufactured by you.
10. Please contact a Renesas Electronics sales office for details as to environmental matters such as the environmental compatibility of each Renesas Electronics product. Please use Renesas Electronics products in compliance with all applicable laws and regulations that regulate the use of controlled substances, including without limitation, the EU RoHS Directive. Renesas Electronics shall have no liability for any damages or losses arising out of the use of Renesas Electronics products beyond such specified ranges.
11. This document may not be reproduced or duplicated, in any form, in whole or in part, without prior written consent of Renesas Electronics.
12. Please contact a Renesas Electronics sales office if you have any questions regarding the information contained in this document or Renesas Electronics products, or if you have any other inquiries.

(Note 1) "Renesas Electronics" as used in this document means Renesas Electronics Corporation and also includes its majority-owned subsidiaries.

(Note 2) "Renesas Electronics products" means any product developed or manufactured by or for Renesas Electronics.
