

# APF3236LSEKJ3ZGKQBKC

3.2 mm x 3.6 mm Full-Color Surface Mount LED Lamp

# DESCRIPTIONS

- The Hyper Red device is based on light emitting diode chip made from AlGaInP
- The Green source color devices are made with InGaN on Sapphire Light Emitting Diode
- The Blue source color devices are made with InGaN Light Emitting Diode
- · Electrostatic discharge and power surge could damage the LEDs
- . It is recommended to use a wrist band or anti-electrostatic glove when handling the LEDs
- All devices, equipments and machineries must be electrically grounded

### **FEATURES**

- 3.2 mm x 3.6 mm SMD LED, 1.1 mm thickness
- Low power consumption
- · One red, one green and one blue chips in one package
- Package: 1000 pcs / reel
- Moisture sensitivity level: 3
- RoHS compliant

## **APPLICATIONS**

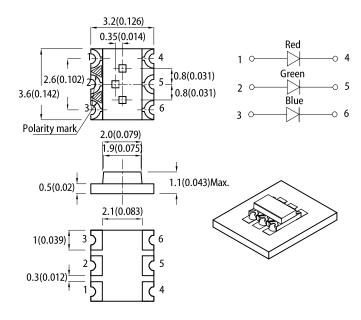

- Backlight
- Status indicator
- · Home and smart appliances
- · Wearable and portable devices
- · Healthcare applications

## **ATTENTION**

Observe precautions for handling electrostatic discharge sensitive devices

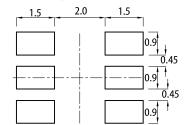

# PACKAGE DIMENSIONS

#### **RECOMMENDED SOLDERING PATTERN**

(units : mm; tolerance : ± 0.1)

Notes

1. All dimensions are in millimeters (inches)

Tolerance is ±0.2(0.008") unless otherwise noted.
The specifications, characteristics and technical data described in the datasheet are subject to

change without prior notice. The device has a single mounting surface. The device must be mounted according to the specifications

## **SELECTION GUIDE**

| Part Number          | Emitting Color<br>(Material) | Lens Type   | lv (mcd) @ 2mA <sup>[2]</sup> |      | Viewing Angle <sup>[1]</sup> |  |
|----------------------|------------------------------|-------------|-------------------------------|------|------------------------------|--|
|                      |                              |             | Min.                          | Тур. | 201/2                        |  |
| APF3236LSEKJ3ZGKQBKC | Hyper Red<br>(AlGaInP)       | Water Clear | 20                            | 40   |                              |  |
|                      | Green (InGaN)                |             | 20                            | 60   | 150°                         |  |
|                      | Blue (InGaN)                 |             | 4                             | 10   |                              |  |

Notes

41/2 is the angle from optical centerline where the luminous intensity is 1/2 of the optical peak value.
2. Luminous intensity / luminous flux: +/-15%.
3. Luminous intensity value is traceable to CIE127-2007 standards.

# **Kingbright**

## ELECTRICAL / OPTICAL CHARACTERISTICS at T<sub>A</sub>=25°C

| Parameter   | Cumhal  | Emitting Onland            | Value               |                   | 11-14 |  |

Notes:

The dominant wavelength (λd) above is the setup value of the sorting machine. (Tolerance λd: ±1nm.)
Forward voltage: ±0.1V.
Wavelength value is traceable to CIE127-2007 standards.
Excess driving current and / or operating temperature higher than recommended conditions may result in severe light degradation or premature failure.

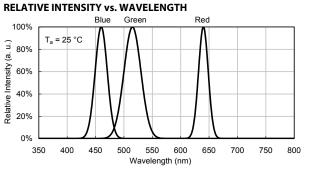

### ABSOLUTE MAXIMUM RATINGS at T<sub>A</sub>=25°C

Notes

 Don't cause stress to the LEDs while it is exposed to high temperature.
The maximum number of reflow soldering passes is 2 times.
Reflow soldering is recommended. Other soldering methods are not recommended as they might cause damage to the product
