

HG1360XL

ESD Heel Grounder - For Large Footwear

Heel grounders provide ESD grounding protection for staff on the move. Fits larger sized footwear.

The HG1360XL Series Heel Grounders are constructed from durable materials and features a stretch Velcro closure to maximize fit and comfort. The cup is designed to fit larger sized footwear, such as men's sized 12 and above. The 1.25" reversible cup is designed to extend the life of the heel grounder.

Heel grounders connect the person wearing them to ground via a proper floor mat or flooring material. Wearing the conductive ribbon inside the shoe or sock assures proper electrical contact with the user. The ribbon connects to the conductive rubber to complete the circuit between the operator and the static controlled floor or mat.

A buried 1 meg ohm resistor is standard. Heel grounders are worn on both feet to provide consistent grounding while in motion.

Meets or exceeds requirements of ANSI ESD-S20.20.

Size: XL

Stretch Velcro

Features

- Extra-Large Sized Heel Ground for Larger Sized Shoes: Mens Size 12+
- Reversible Cup Design for Long Life
- Stretch Velcro Closure Strap Allows Maximum Fit and Comfort
- Buried 1 Meg Resistor for Safety
- Color: Black

Applications:

Heel grounders provide a path-to-ground for personal that must be mobile. They must be used in conjunction with an ESD floor or mat.

Specifications:

Resistor: 1 meg ohm (+/- 5% tolerance), buried

Rubber Exterior: 10^5 ohms, 1.25" wide

Ribbon: Conductive yarn in gray polyester ribbon

Part Numbers:
