Description and Applications

The SDM2A40CSP is a 40V 2A Schottky barrier rectifier optimized for low forward voltage drop and low leakage current housed in a compact chip scale package (CSP) that occupies only 1.28mm^2 board space with a low profile. The low thermal resistance enables designers to meet design challenges of increasing efficiency while at the same time reducing board space. It is ideally suited for use in portable applications as a:

- Blocking Diode
- Boost Diode
- Switching Diode
- Reverse Protection Diode
