

CM1419

Praetorian™ L-C EMI Filter with ESD Protection for Headset Speakers

Product Description

The CM1419 is an L-C EMI filter array with ESD protection that integrates two Pi-filters (C-L-C) for a headset speaker. The CM1419 has component values of 117 pF/3.0 nH/117 pF. The parts include ESD protection diodes on all input/output pins, and provide a very high level of protection for sensitive electronic components against possible electrostatic discharge (ESD). The ESD diodes connected to the filter ports safely dissipate ESD strikes of ± 30 kV, which is beyond the maximum requirement of the IEC61000-4-2 international standard. In accordance with MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the pins are protected for contact discharges at greater than ± 30 kV.

This device is particularly well suited for portable electronics (e.g. mobile handsets, PDAs, notebook computers) because of its small package format and easy-to-use pin assignments. In particular, the CM1419 is ideal for EMI filtering and protecting speaker output lines of the headset speaker from ESD in mobile handsets. Most speakers have an impedance of 8Ω . However, to maximize the power output, the resistance of an EMI filter needs to be as low as possible. The CM1419 addresses this by using a C-L-C based EMI filter with an inductor having less than 0.35Ω of resistance.

The CM1419 comes with *OptiGuard*™ coating resulting in improved reliability at assembly. The CM1419 is housed in a space saving, low profile Chip Scale Package with RoHS-compliant, lead-free finishing.

Features

- Two Channels of EMI Filtering
- ± 30 kV ESD Protection (IEC 61000-4-2, Contact Discharge)
- ± 30 kV ESD Protection (HBM)
- *OptiGuard*™ Coating for Improved Reliability at Assembly
- Greater than 30 dB of Attenuation at 1 GHz
- 5-Bump, 1.590 mm X 1.220 mm Footprint Chip Scale Package (CSP)
- These Devices are Pb-Free and are RoHS Compliant

Applications

- Headset Speaker Port in Mobile Handsets
- I/O Port Protection for Mobile Handsets, Notebook Computers, PDAs etc.
- EMI Filtering for Data Ports in Cell Phones, PDAs or Notebook Computers

APPLICATION INFORMATION

Parameter	Value
Pad Size on PCB	0.240 mm
Pad Shape	Round
Pad Definition	Non-Solder Mask defined pads
Solder Mask Opening	0.290 mm Round
Solder Stencil Thickness	0.125 mm – 0.150 mm
Solder Stencil Aperture Opening (laser cut, 5% tapered walls)	0.300 mm Round
Solder Flux Ratio	50/50 by volume
Solder Paste Type	No Clean
Pad Protective Finish	OSP (Entek Cu Plus 106A)
Tolerance – Edge To Corner Ball	±50 µm
Solder Ball Side Coplanarity	±20 µm
Maximum Dwell Time Above Liquidous	60 seconds
Maximum Soldering Temperature for Lead-free Devices using a Lead-free Solder Paste	260°C
