

Stranded-Core Wire Spool – 25ft – 22AWG – Blue

PRODUCT ID: 2980

Description

This wire is flexible, strong, and super easy to solder, too!

Stranded core wire is best used for wiring jigs where there's bending or movement expected. Works well with terminal blocks as well. It's *not* great for use with breadboards (without tinning)

For prototyping with breadboards, perfboards, and terminal blocks check out our solid-core wires.

Comes with one 25ft spool of **blue** wire. The wire is 22AWG stranded with an outer diameter of 1.6mm.

Technical Details

Length: 25 feet / 7.6m

Outer Diameter: 1.6mm / 0.06"
