

Series 19

Proven. Streamlined and tactile.

<https://eao.com/>

19 Information about the Series

Key advantages

- Excellent tactile feedback
- Gold contacts available for low voltages and currents
- Bright, homogenous illumination
- Compact construction
- Can be mounted on PCBs

Typical application areas

- Audio / video
- Measurement technology
- Medical engineering

Functions

- Illuminated pushbutton
- Indicator

Design

- Raised

IP front protection

- IP40

Rating

- 42 VAC (100 mA)

Mounting cut-outs

- Ø 8 mm

Terminal

- Soldering terminal
- PCB (with PCB plug-in base)

Lens Material

- Plastic

Markings

- Engraving
- Film insert

Approvals

- No approvals

Conformities

- CE
- 2011/65/EU (RoHS)

Actuator with snap-action switching element

Switching system

Single-break, snap-action switching system
1 normally open contact

Material

Material of contact

Gold plated Silver, Silver plated

Switch housing

Plastic

Actuator housing

Plastic, colour black

Mechanical characteristics

Terminals

Universal terminal

Max. wire diameter 2 x 0.8mm

Max. wire cross-section of stranded cable 1 x 0.75mm²

Plug-in terminal 2.0mm x 0.5mm

For these terminals we offer sockets for PCB mounting.

Tightening torque

For fixing nut max. 0.2Nm

Actuating force

1.6N

Actuating travel

Approx. 2.8mm ±0.2mm

Mechanical lifetime

2 million cycles of operations

Electrical characteristics

Switching voltage and switching current

Silver plated:

Max. 50 VAC, 0.8 A/72 VDC, 0.7 A

Min. 20V, 10mA

Gold plated:

Max. 50 VAC, 100mA/72 VDC, 70mA

Min. 100µV, 50µA

Electric strength

2500 VAC, 50Hz, 1 minute between all terminals and earth,
as per IEC 60512-2-11

Ambient conditions

Operating temperature

Without illumination -25 °C ... +65 °C

With incandescent lamp -25 °C ... +45 °C

With LED -25 °C ... +65 °C

For indicators and illuminated pushbuttons mounted as a block,
make sure the heat can escape freely.

Storage temperature

-40 °C ... +85 °C

Protection degree

IP40 front side, as per DIN EN 60529

Approvals

Conformities

2011/65/EC (RoHS)

19 Technical data

Actuator with low-level switching element

Switching system

This low-level switching system was developed for low switching voltages and currents.

Single-break momentary contact, as normally open or normally closed with 4 independent points of contact.

1 normally open or 1 normally closed contact.

Material

Material of contact
Gold plated

Actuator housing
Plastic, colour black

Mechanical characteristics

Terminals
Universal terminal
Max. wire diameter 2 x 0.8 mm
Max. wire cross-section of stranded cable 1 x 0.75 mm²

Plug-in terminal 2.0 mm x 0.5 mm

Shock resistance
(Single impacts, semi-sinusoidal)
15 g for 11 ms, as per IEC 60512-4-3, DIN EN 60068-2-27

Approvals

Conformities
2011/65/EC (RoHS)

Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilo-

volts in amplitude even when nominal circuit voltages are low (e.g. 12 VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (V_R) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!

Switching with inductive load
Fig. 1

Counter EMF
over load without free-wheeling diode
Fig. 2

LED polarity

When fitting the LED element the polarity has to correspond with the respective terminal, (+) goes to +.

Recommended LED series resistors for optimum illumination

	LED red	LED yellow	LED green	LED white	LED blue
6 VDC	390R	390R	1K5	390R	390R
12 VDC	1K	1K	4K7	1K	1K
24 VDC	2K2	2K2	10K	2K2	2K2
