

Honeywell's HG1120 and HG4930 Inertial Measurement Unit (IMU) Evaluation Kits

Honeywell's Inertial Measurement Unit (IMU) Evaluation Kits are available to demonstrate and evaluate Honeywell's Industrial, Non ITAR IMUs. These kits include:

- A Honeywell custom designed PC connection board that will convert RS-422 to USB.
- A USB cable that connects the interface PC connection board with a computer.
- A memory stick with Honeywell's HGuide Data Reader user interface software.
- A Quick Start Guide

The PC connection board will enable the user to quickly evaluate and integrate the IMU into their systems application. Honeywell's HGuide Data Reader Software will allow the user to observe dynamic motion, evaluate unit health of the IMU and rapidly integrate software.

The IMU Evaluation Kit does not include the IMUs. These are purchased separately.
