

V-TYPE MARKERS

PUSH-ON MARKER SYSTEM

Technical Datasheet

TTDS-096 Revision 3 - August 2015

V-Type markers are individual push-on characters used to identify wires and small cables permanently. They are designed with an expanding profile which enables each marker to accommodate a wide range of wire and cable sizes.

V-Type markers are a simple, cost effective solution for many commercial wire identification applications. The markers are supplied chevron cut to ensure legends remain aligned.

The standard marker range is available in white or yellow with black print. They are supplied either loose in a box or on reels.

Color coded markers are also available within the range.

Features

- Four sizes covering wire diameters up to 16.0mm (0.63 inch).
- Color Coded 0 - 9.
- Characters A - Z and symbols.
- Color Matched to BS6746C 1990 and IEC 60304.
- Excellent resistance to common industrial fluids, as described in RW-2535

Applications

- Pre-Termination wire and cable identification.
- Identification of wire or cable diameters 1.4 to 16mm (0.055 to 0.63 inches).
- Electronics, Mass transit and general Industrial uses.

Specifications / Approvals

TE Connectivity Standard **RW-2535**

Industrial

SAE AS 5942 Marking of Electrical Insulating Materials.

BS 3858 Specification for binding and identification sleeves for use on electric cables and wires.

IEC 60304 Standard Colours for Insulation for Low Frequency Cables and Wires

Temperature Rating

- Operating Temperature -45°C to 70°C (-49°F to 158°F).

Design For Environment

- The PVC used for these markers meets all current RoHS and REACH legislation.
- Further information and a downloadable declaration covering RoHS and REACH compliance can be found at the 'TE Product Compliance Support Centre':

<http://www.te.com/usa-en/utilities/product-compliance.html>

Where possible, TE has tested product as a finished item, including the print. Operational tests are followed by an assessment of mark adherence to validate fit, form and function. Further details can be found in TE standard RW-2535.
