

PART NUMBER: 76000723

Connect EIA 422/485 Devices to Digi MEI products that have 10 pin RJ45 connectors

The RJ45/Bare Wire 48" cable provides a customizable connector for connecting EIA422/EIA485 devices to the standard Digi 10 pin RJ45 serial connector. Customers or Integrators can use this cable to make EIA 422/EIA485 connections by attaching the wires to a terminal block or by wiring them into a DB9 or DB25 connector hood for the specific device they wish to use.
