Low Profile Ceiling Mount MIMO 5G DAS Antenna 698-7125 MHz

The CFD 5G two-port MIMO DAS antennas series is the latest addition to Laird Connectivity's extensive DAS antenna portfolio. They extend the current frequency offering up to 7125 MHz to service more of the available 5G frequency bands. Mounting options include hard and ceiling tile mounting and with or without screw holes for additional security.

These antennas are applicable for environments where aesthetics and wide-angle coverage are necessary for successful wireless deployment. Their surprisingly small size and ultra-low-profile enables maximum mounting flexibility while maintaining desired in-building aesthetics. CFD 5G series antennas support 698-960, 1350-1550, 1690-4200, and 5150-7125 MHz in an ultra-low-profile format that is discrete and unobtrusive.
