

SRBC-16A2A

Non-Isolated DC-DC Converter

The Bel SRBC-16A2A modules are a series of non-isolated dc/dc converters that deliver up to 16 A of output current with full load efficiency of 92% at 3.3 VDC output. These modules provide precisely regulated voltage programmable via external resistor from 0.75 to 5.0 VDC over a wide range of input voltage (8.3 - 14 VDC).

These modules have a sequencing feature that enables designers to implement various types of output voltage sequencing when powering multiple voltages on a board. The open-frame construction and small footprint enable designers to develop cost and space-efficient solutions. Standard features include remote on/off, remote sense, over current protection, short current protection, wide input, and programmable output voltage.
