

Features

- Universal AC input (85-264VAC)
- Protections: SCP, OVP, OLP, OTP
- DC OK indicator LED with relay contacts
- 150% (180W) peak load capacity
- Built-in active PFC, PF>0,95
- High efficiency up to 92.5%

DIN Rail Series

REDIN120

120 Watt DIN-Rail Power Supply

Description

These DIN-rail mounted power supplies have a robust case, 4mm screw terminal connectors and use high reliability components to give a long, trouble-free life. The REDIN120 can be end mounted to save rail space or side mounted for use in low-profile cabinets. The units can deliver up to 150% start-up power and allow n+1 parallel operation to increase the continuous output current or for supply redundancy. Relay contacts simplify DC OK monitoring. The REDIN120 series is designed for demanding commercial and industrial applications with UL508, UL60950, IEC60950 CB report and CE (LVD + EMC + RoHS) certifications. They come with a full 5-year warranty.

INSTALLATION and APPLICATION

Mounting Multiple Power Supplies

PARALLEL OPERATION

Single Operation:

- 1) Make sure that the front panel switch is set to "single Use."
- 2) The output voltage can be increased by trim pot to compensate any cable losses.

Parallel Operation:

- 1) Make sure that the front panel switch is set to "single Use" on each power supply.
- 2) Adjust each power supply to the exact same output voltage with same load and cooling conditions.
- 3) Set the front panel switches to "Parallel Use." Use the same wire length for each power supply (star connection) and energize all units at the same time to avoid triggering overload protection.

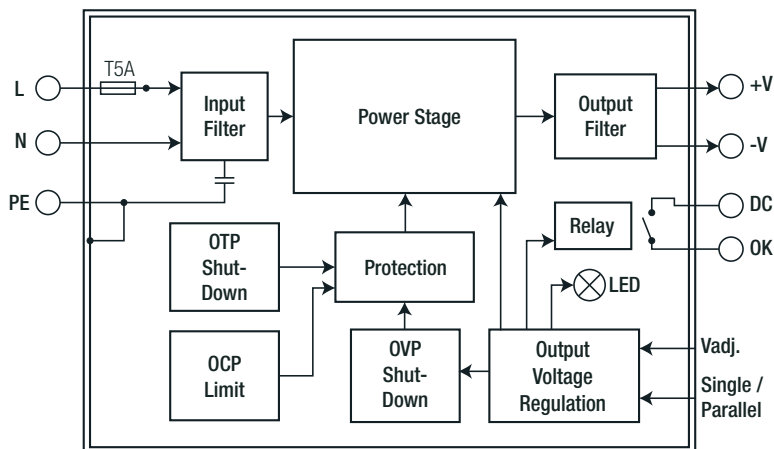

Derate the maximum output power to 90% of nominal ratings.

For operation with more than three power supplies in parallel or series operation, please contact RECOM technical support for advice.
