

SMD03M - SMD Tweezers for LCR/ESR with 2mm sockets

SMD03M - SMD Tweezers for LCR/ESR with 2mm sockets

Information:

SMD tweezers designed for the 2mm LCR or ESR plugs. These tweezers are superb quality, with gold plated tips and compatible with industry standard 2mm banana plugs. These fit easily and securely to the 2mm LCR or ESR plugs.

The gold tips can touch together which means they are suitable for even the smallest parts (smaller than 0402s for example). Additionally, the tips can open wide enough for very large SMD parts (such as Case D tantalums or even larger).

Supplied with fitting and probe compensation instructions
