

200° MiniSeal High-Performance, Immersion-Resistant Crimp Splices

Product Facts

- Immersion-resistant crimp splices while meeting all requirements of SAE-AS-81824/1 (modified for 200°C applications)
- Small size
- Light weight
- Transparent heat-shrinkable insulation sleeve provides environmental protection and strain relief
- Splices provide sealing to unetched wire insulations
- No need to staffer wire splices

In-line nickel plated sealed crimp splices for 200°C applications were developed for the growing needs of high temperature applications in the aerospace and defense industry.

200°C MiniSeal crimp splices provides the smallest, lightest, and the most environmental-resistant splices available, while meeting all requirements of SAE-AS81824/1 (modified for 200°C applications).

Applications

MiniSeal wire-to-wire splicing products are ideal for aerospace and defense applications where performance, reliability or size reduction is essential.

Designed to provide an immersion resistant in-line splice on 1:1 wires for the following: wire range from 26 AWG to 12 AWG; nickel-plated conductors and insulation rated for at least 135°C.

Available in: Americas Europe Asia Pacific

8-28

200° MiniSeal High-Performance, Immersion-Resistant Crimp Splices (Continued)

Product Characteristics

/laterial	
Insulation	Heat-shrinkable, transparent blue, radiation cross-linked modified fluoropolymer
Crimp splicer	Base Metal: Copper alloy 101 or 102 per ASTM B75 Plating: Nickel per SAE AMS-QQ-N-290 Color Code: see table below
Meltable rings	Environment resistant modified thermoplastic fluoroelastomer Color: Light blue
vpical Performance	
Voltage drop	6.9 mV at 4.5 A vs 8.1 mV for an equal length of wire
Tensile strength	Exceeds strength of conductor
Dielectric strength	2.5 kV
Temperature rating	-55°C to 200°C [-67°F to 392°F]
Insulation resistance	5000 megohms
1 0
