The 15ACM\_S3 series is one of GAPTEC's highly efficient green power AC-DC Converter series. They feature ultra-wide input range accepting either AC or DC voltage, high efficiency, low power consumption and reinforced isolation. All models are particularly suitable for industrial control, electric power, instrumentation and smart home applications which have high requirement for dimension and don't have high requirement on EMC. For extremely harsh EMC environment, we recommend using the application circuit show in Design Reference of this datasheet.

15ACM_12S3					220μF/35V		
15ACM_15S3			680μF/35V		220μF/35V		
15ACM_24S3			470μF/35V		220μF/35V		

#### Note:

- C1: input capacitors, C2: output storage capacitors, they must be connected externally.
- We recommend using an electrolytic capacitor with high frequency and low ESR rating for C3 (refer to manufacturer's datasheet). Combined with C2, L1, they form a pi-type filter circuit. Choose a capacitor voltage rating with at least 20% margin, in other words not exceeding 80%. C4 is a ceramic capacitor, used for filtering high frequency noise. A suppressor diode (TVS) is recommended to protect the application in case of a converter failure and specification should be 1.2 times of the output voltage.
