Features

uEZGUI-EXP1

EXP1 mounted to uEZGUI-2478-43WQS

Software Drivers Available[*]

µEZ® (pronounced Muse) is an open source rapid development platform that supplies application developers with an extensive library of open source software, drivers, and processor support – all under a common framework. µEZ® allows companies to focus on innovation and their value-added applications while minimizing development time and maximizing software reuse.

The diagram below shows a typical embedded application stack. The µEZ® components comprise three primary categories to simplify embedded application development:

- Operating System Abstraction Layer (µEZ® OSAL)
- Sub-system drivers (ex: µEZ® TCP/IP, µEZ® USB, µEZ® Driver)
- Hardware Abstraction Layer (µEZ® HAL)

[*]Drivers are available when the uEZGUI-EXP1 is paired with a uEZGUI-2478-43WQS or similar unit.
