### **Series WR**

# General Specifications

#### **Electrical Capacity (Resistive Load)**

15A @ 125/250V AC or 15A @ 30V DC Power Level:

#### **Other Ratings**

**Contact Resistance:** 10 milliohms maximum for solder lug, screw & quick connect terminal models 30 milliohms maximum for wire lead terminal models **Insulation Resistance:** 200 megohms minimum @ 500V DC **Dielectric Strength:** 1,250V AC minimum between contacts for 1 minute minimum 3,750V AC minimum between contacts & case for 1 minute minimum 30,000 operations minimum Mechanical Life: **Electrical Life:** 15,000 operations minimum for circuit 11 and 12 models 10,000 operations minimum for circuit 13, 15, 18, 19 models Angle of Throw: 24°

#### Materials & Finishes

Rocker:	Phenylene oxide
Outer Housing:	Polyamide (UL94V-0)
Inner Case:	Melamine (UL94V-0)
Cover for Wire Lead Models:	Glass fiber reinforced polyamide (UL94V-0)
Flange Gasket:	Polychloroprene rubber
Movable Contactor:	Copper with silver plating
Movable Contacts:	Silver alloy plus copper with silver plating
Stationary Contacts:	Silver alloy plus copper with silver plating
Terminals:	Brass with tin plating
Wire Lead Covers:	Heat resistant polyvinyl chloride (Leads are AWG 14)

#### **Environmental Data**

	<b>Operating Temp Range:</b>	–25°C through +85°C (–13°F through +185°F)
	Humidity:	90 ~ 95% humidity for 96 hours @ 40°C (104°F)
	Vibration:	10 ~ 55Hz with peak-to-peak amplitude of 1.5mm traversing the frequency range & returning
_		in 1 minute; 3 right angled directions for 2 hours
	Shock:	50G (490m/s <sup>2</sup> ) acceleration (tested in 6 right angled directions, with 5 shocks in each direction)
	Front Panel Seal:	IP67 of IEC60529, dust tight & water protected during temporary immersion for all models
	Behind Panel Seal:	IP60 of IEC60529, dust tight but not water protected for solder lug, screw & quick connect models
		IP67 of IEC60529, dust tight & water protected during temporary immersion for wire lead models
_		
	Installation	
	Soldering Time & Temp:	Manual Soldering: See Profile A in Supplement section.
	Cleaning:	Hand clean locally using alcohol based solution.
_		, .
	Standards & Certifications	
	Flammability Standards:	UL94V-0 outer housing, inner case, & outer cover on wire lead models
	UL:	File No. E44145 - Recognized only when ordered with marking on switch.
		Add "/U" or "/CUL" to end of part number to order UL recognized switch.
_		All models approved at 15A @ 125/250V AC & 15A @ 30V DC.
	EN:	No. 61058-1
		WR11 & WR12 models meet European Norm for 3mm contact gap to prevent contact welds.
	Wining Material Standards.	
	Wiring Material Standards:	UL AWM 1015 Recognized at Flammability VW-1.
		Temperature Range – 20°C ~ +105°C; Maximum Load 600V; AWG 14.
		CSA TEW 105 Certified at Temperature Range –20°C ~ +105°C; Maximum Load 600V.

# Distinctive Characteristics

Single unit construction of the flange and outer housing gives added protection from environmental elements.

Specially designed contact mechanism for breaking light welds.

Minimal contact bounce achieved with specially designed interlocked switching mechanism.

Heat resistant resin used for outer housing, inner case, and cover on wire lead models meets UL94V-0 flammability standard and provides high arc and tracking resistance.

Available with solder lug, screw, quick connect, and wire lead terminations.

#### Sealed Construction Meets IP60 & IP67 Standards

Solder lug, screw, and quick connect terminal models meet IP67 of IEC60529 Standards at front panel (dust tight and water protected for temporary immersion, patent pending). Behind panel standard is IP60 (dust tight but not water protected).

Wire lead models conform fully to IP67 of IEC60529 Standards at front and behind panel (dust tight and water protected for temporary immersion). Switch base is epoxy sealed and covered by an outer case for further protection from dust and water. (Switches cannot be operated under water. Contact factory for further details regarding operating environment.)
