- **Low leakage current down to 100 pA**
- **Low ESL and Low ESR**
- **Suitable for lead free reflow-soldering** *Please refer to our assembly Application Note for further recommendations

Thanks to the unique IPDiA Silicon capacitor technology, most of the problems encountered in demanding applications can be solved.

High Temperature Silicon Capacitors are dedicated to applications where **reliability** up to **200°C** is the main parameter.

This technology features a capacitor integration capability (up to $250\text{nF}/\text{mm}^2$) which offers capacitance value similar to X7R dielectric, but with better electrical performances than COG/NP0 dielectrics, up to **200°C**.

HTSC provides the highest capacitor **stability** over the full -55°C/+200°C temperature range in the market with a **Temperature coefficient Lower than $\pm 1\%$** .

Key applications

- **All applications up to 200°C, such as military, aerospace and automotive industries**
- **High reliability applications**
- **Replacement of X7R and C0G dielectrics**
- **Decoupling / Filtering / Charge pump (i.e.: motor management, temperature sensors)**
- **Downsizing**

The IPDiA technology offers industry leading performances relative to **Failure rate** with a $\text{FIT}<0.017$.

This technology also offers **high reliability**, up to 10 times better than alternative capacitor technologies, such as Tantalum or MLCC, and eliminates cracking phenomena.

This Silicon based technology is RoHS compliant and compatible with lead free reflow soldering process.
