

Prototyping Boards

Twin Industries prototyping boards designed specifically for Raspberry Pi projects. A great head start for modifying and enhancing Raspberry Pi computers. Mounting holes are provided to attach boards to Raspberry Pi computers. Uncommitted board area for mounting additional components. Cut outs for camera and display cables.

Features:

- · Protoboards for use with Raspberry Pi Model A+ and B+
- · All 40 header signals clearly labeled for easy access to Power, Ground, and GP I/O signals
- · Plated holes. Power and ground signals connected. Capacitor locations.
- · Mounting holes to attach headers, standoffs, and camera unit. Footprints for EEPROMs

Part#3.14-2 Prototyping Board

Part#3.141-2 (with accessories)
Raspberry Pi B+ and accessories sold separately

Part Numbers:

3.14-2

Dim: 113mm x 69mm

Larger than HAT to allow more components and prototyping options. Easy to follow GP I/O connections. 3 bussed holes for each header pin.
