

Featuring our most popular slitting, ringing, and cutting tools, this Fiber Duct Kit provides a large range of tools needed to access ducts to repair or replace fiber optic cable. This tool kit features the following:

- **MDC-14, MDC-28, MDC-64** have triangular blades that provide square and straight cuts by holding the tubing in place
- **FS-1416** allows you to score and ring 14/10 and 16/10 fiber optic microducts without any adjustments to the tool
- **TC-300** performs radial cuts on 1/4" to 3" (6.3 - 76 mm) copper, brass, aluminum and plastic tubes
- **RCS-30** creates mid-span slits and window cuts in large ducts and heavy-duty cables using a unique ratcheting design
- **H-90** Rugged 21 Pocket Tool Case neatly stores these tools
