UNIVERSAL WIRE MINDER

AMERICAN MADE

The Kendall Howard Universal Wire Minder makes organizing and protecting cables a snap. Network cables that are not managed properly will decrease productivity, increase down time, and make it more difficult to trace connectivity issues. Rewiring a network or replacing cabling infrastructure can cost tens of thousands of dollars - so do it once, and do it right.

What if you don't have a rack? No problem. The Universal Wire Minder can also be mounted along walls or under desks, making it the perfect solution to all of your cable organization needs.

FEATURES

Multiple Uses - The unique design allows the Universal Wire Minder to be installed onto both cage nut and tapped rails within wall mount cabinets, wall mount racks, Telco racks, and even full size server cabinets.

Universal Mounting - The easy-to-use design can be attached to rack mount rails in 8 different positions to route and manage cables.

Large Cable Capacity - The 3" x 1.5" opening can accommodate a variety of cables such as network, telecom, fiber optic, and power cables.

EIA Compliant - Mounting holes are designed to comply with EIA compliant rack rails and components.

SPECIFICATIONS

Part Number	0004-1-002-01
Cable Capacity	3" x 1.5" opening
Width	3.875"
Depth	2"
Height	1.72" (1U)
Weight	0.45 lbs.

Material(s)	CRS (Cold Rolled Steel)
Finish/Color	Black Powder Coat Finish
UPC	879447000009
Warranty	Limited Lifetime Warranty
Shipping Method	FedEx Ground
