NuPower Xtender™ 12B04A-04 L-Band Bidirectional Amplifier

18 Watt CW 2.5 Watts Linear, 5% EVM @ 34 dBm 1.435 GHz - 1.85 GHz

P/N· NW-BA-12B04A-04

The NuPower Xtender[™] Model NW-BA-12B04A-04 is a small, lightweight, and powerefficient bidirectional amplifier ideal for extending the communication range of halfduplex L-band transceivers running constant-envelope or near-constant-envelope waveforms. The bidirectional amplifier generates 18 Watts of RF power from 1435 to 1850 MHz in transmit mode and the integrated low-noise amplifier provides a minimum of 13 dB of gain in receive mode.

Based on the latest gallium nitride (GaN) technology, the Xtender offers greater than 30% power efficiency at most frequencies and its compact size makes it ideal for integration into spaceconstrained platforms. Accepting a +5 dBm RF input, the Xtender provides 35 dB of gain. The Xtender also features over-voltage and reverse-voltage protection and operates over a wide temperature range of -30 to +60 °C.
