

SuperMini

Credit Card Size | 10,000mAh | 18W Power Delivery

| Superior Portability & Compact

Tiny as a credit card, SuperMini is 30% smaller than a traditional 10,000mAh external battery, so it fits in virtually any bag or pocket. SuperMini uses a type of battery cell called 21700. Each cell provides 5,000mAh of charge capacity, making them 50% more energy dense than the cells used in a typical chargers. With SuperMini in your pocket, you are carrying a mini power station for your trip. Mini size, zero burden.

| Charge Fast, High Performance

SuperMini equipped with 2 USB ports, a USB-C port for input and output and a USB-A port for output. With 18W Power Delivery (PD), SuperMini can charge iPhone X up to 50% within 30 mins, while it takes only 3 hours to recharge itself, which can save 45% time (compared to traditional 5V/2A, 5.5hs recharge). It's USB-A port supports ZEN+2.0 with Adaptive Quick Charge, taking advantage of the rapid-charging capabilities of compatible QC 3.0 devices.

| Power Up in Style

SuperMini is available in Black, Silver, Red Sunrise and our stunning new Blue Horizon. We boldly adopted this distinctive blue ombre color, which is usually seen on high-end smartphones, but is very rare in portable chargers. This distinctive blue horizon color with an extra compact design can match your fashion style. One of a kind color creates another kind of beauty. Also, its classic suitcase-look design makes it extremely durable. Together, SuperMini is an external battery with both stylish and sturdy.

| Massive Power, Universal Compatibility

With credit card size and 10,000mAh of charge capacity, SuperMini conveniently maintains 1-2 days of mobile power for flagship phones and tablets, and can nearly double the battery life of smaller laptops. SuperMini's broad compatibility extends to Apple, Samsung Galaxy, Huawei, OnePlus and Nintendo products, to name a few.

| Function Superiority

- With 2 USB Ports output, SuperMini can charge two devices simultaneously.
- SuperMini features pass-through charging function which allows you to charge its internal battery while charging your devices.
